Ifnowgoto [xtrertetvwxyz]

Now Ask why then the answer is because trauma of this level [xtrextrevwxwyz] will stop brain functional but only allow pain signal as designed by Ya to punish and traumatize evil doers if we look at the pain threshold it has been broken down normally maximum is 780 dblm meaning dabcle larm if we Ask [unknown hiding -artificial intelligence created] inside trcxrytrxct then his reply is I was sent to create ... now something send ultvcer to brain [xtrcyvertcert] and caused complex cert - xtrertertctvy that shuts down the brain to

prevent further damage

Now if we Ask the pain threshold it is 8972 and it causes
firostuvwxyz

Now if we check the current status then this is the answer
unknown has been temporarily frozen so we can write this but
he has less than two seconds of movements only to adjust
everything preparing for death

If these movements don't occur then no data can be collected
because the weapon used by me is from the gods designed to
punish stubborn humans and punish this does because the
code turned a full ae body into an incapacitated body in a
fraction of a second living no time at all for body adjustments
before death where information is collected then that system is
reset to prepare for the next stage of life the spirit.ya world

Now if we look at the collected data this is what was collected
in less than a second of this unknown in this state

1] death rate recorded at -786 per second world record

2] age recorded as 79 days styret days [not human but things
very close to humans discovered on Xtretretstuvw translated
to Neptune planet

3] xtretuvwxyz which denotes place on the body through an
alphabetical order letter reading system of the body this is
recorded as 711 dg where dg is dermerlat gogercile the one
that measures breathing of these near human animals [
because they have no eyes they uses a telescope like light to
see and strangled their eyes are on the back waist line facing
invade the body that means if we check we can see that this
thing see like we do but it follows the light of the telescope

Now let's continue with recordings

4] iris rate of convulsions is everything being seen minus the periphery meaning what it can see as recorded on the retina minus what it can see on the sides to the power 4

5] if we Ask what can be done in this situation then this is the answer iris vision can be saved by the body in such a way that if we look at this later on we can decode everything

If we Ask the unknown if he can hear us this is his reply hear what swarmger translation asshole but this is because if we Ask why this is the closets to a translation in any language

Now if we Ask what could be then this is the reply the pain surely can be reduced greatly it is cruel to increase maximum pain when all you want is death

The pain can be lowered by code xtruvwxtytwytz that can be triggered by binaryreverse code ...

Now if we see what happens is that the unknown has gone back but only in imaginary world

If we check again in real world unknown has died

Time of death 87.92 Yahweh time his vitals are

Heart rate 72mbl per second where mbl is marblererlcle

If we Ask what happens now this is the answer for three days will the needed conversation take place the first day the body will prepare to exit earth then start the long journey to either hell or heaven

The body tells the brain where the soul will go

This is interesting because this is the first time this has been recorded in the history of mankind the body send a message to the brain just a fraction of the second before death

send.ya.hell

Send.ya.heaven

The result is decided by what has been saved before death but not just before meaning the body prepares a human being where to go in life?

Now let's check how it does this the brain will collect this data using a stencil created by Ya this is because it is written

Ya.creato.stencil.xtreterstuvwxyz

If we are to translate this means that this stencil is from yahweh.ya

But what is not sure is how the body sends it to Ya if we Ask this is what we get we can only send requested materials some stencil are needed only after death and this is one of them

If we Ask why this happen then this what is said the body over time know how to save all the needed information on day of death that means if we use this stencil we can create a template we can use to tell people where their souls will go after death this is the template

1] ask yourself whatif

2] what was

3] ask if not then what

4] ask what about them

5] ask what about you

6] ask when and how

- 7] ask what the fuck
- 8] what is to be is to be
- 9] if you can then we can
- 10] check status
- 11] ask what for
- 12] ask what then
- 13] ask if you dont then who
- 14] ask what to be is to be
- 15] what is to be is to be
- 16] what can be is to be
- 17] what was to be can be
- 18] what was
- 19] what was to be
- 20] what is to be
- 21] what is to be
- 22] what was is not
- 23] what could be and I not
- 24] what was and is not
- 25] what is to be is to be
- 26] what is
- 27] what was

28] what is to be and when

29] can we and why

Now we get all the figures this is the formula to hell or heaven

If we add questions 1 to 29 minus questions 3 to 8 then If answer is positive then you go to hell

If the answer is negative the you go to heaven the body will ask itself a lot of questions these are the questions

1] what was

2] what can be

3] what was

4] what is

5] what was

6] what can be

7] what is to be

8] what could be

9] what was

10] what is to be

11] what can be

12] what is to be

13] what will be

14] what was to be before

15] what is to be now

- 16] what can be now
- 17] if we can then what
- 18] if we can't then what
- 19] if we can then when
- 20] what can be
- 21] if we can then when
- 22] what if
- 23] what was
- 24] what was
- 25] what will be
- 26] if we can then what
- 27] what will be and when
- 28] if we can't then who can
- 29] to be is to be
- 30] what is to be
- 31] what if
- 32] if what
- 34] if not
- 35] what can be
- 36] what could be
- 37] to be is to

- 38] what was is not
- 39] what could be
- 40] what is to be
- 41] if you don't then what
- 42] if you can't then what
- 43] what is to be
- 44] to see and to think
- 45] to think and to see
- 46] what is that can be
- 47] what is
- 48] what was
- 49] what could
- 50] if not then what
- 51] what I'd to be
- 52] what was to be
- 53] what can't
- 54] what could but can't
- 55] what can but is not
- 56] what could be but
- 57] if not then what
- 58] what can be but

59] what was but is not now

60] if not now then when

61] if not us then who

62] if not them then who

63] if them then why not

64] what can be

65] if only what is to be is to be

66] what was

67] what can be

68] what could be

69] what was to be

70] if not then what

71] if we can't then what

72] to be

73] to be so

74] so to be

75] ask what then

76] ask what was

77] ask what could be

78] what can be is not now

79] if not then what

80] is to be when

Now if we answer these questions and use this stencil then for the dead unknown [-artificial intelligence created] he will go to xtrstuvwyz translated to hell we are not sure.

Now if we go further we can see that if we Ask why this is so this is because hell for us can be here on earth whereas in heaven means another planet for example heaven is Neptune and hell is Venus because I can here screams from hellIf we are to send someone to Venus we simply get binaryreverse from Venus and attach

Now if we Ask why Venus is hell then this is the answer Venus is the orient planet that can keep anything that goes there forever there is no planet on earth that does this

Now let's check what can be done to heaven and hell

Humans have an opportunity to create heaven if they can find the image of God this is what is written in Xrtyxtryesvuwxyrt now let's Ask some serious questions that we can get answers for

1] who created heaven The answer Ya on 009838674620BC

2] why need heaven If we have Neptune?

Ya what is right for humans Neptune is just a planet with perfect opportunities to be heaven but is not heaven

3] if we can ask what if this is the answer heaven is for spirits who will have ejected from the body on day of death through

Exact.now.body.escape.ya

Now why do spirits escape to Ya and not to hell Ya is the sole ruler and deserves that role now if we Ask what can be done

to heaven this is the answer heaven can be made here on earth if humans find Ya image.askwhen

I David Gomadza found the image that means only I can create heaven and he'll on earth

That means there are chances that Ya has seen the possibility of one among us to rise to the challenge if we Ask what can be done to humans to find the image this is the reply [?]

Now let's look ask what is and was and could be Yahweh was the one who created heaven and hell and will always be the one who owns these but others can own theirs as well

What could be but is not that heaven can be much bigger and better and can have sources of energy in the form of silkpasty

Heaven is much for happiness only everyone I have sent to heaven has not returned in fact refuse to do so

Now what is hell?

Hell is ferocious with burning fires for removing decrypted from the silkpasty harvesting there the gods and everyone else needs silkpasty to live forever it now seems hell was built to purify human bodies and harvest silkpasty as you shall see hell can be in the form of a bubble of fire or a place with continues fires the devil.me runs hell and his duties according to Ya are

1] to punish anyone who ends up there

2] to recover silkpasty

3] to enforce heaven or hell

4] to ask why

5] to ask when

6] to ask how

7] to ask if

8] to ask why not

9] to answer when

10] to move if

11] to join when

12] to end how

13] to earn how

14] to advance if

15] to know when

16] to join why

17] to search why

18] to ask how

19] to act why

20] to join why

21] to view what

22] to alert how

23] to injure why

24] to ask who

25] to enjoy how

- 26] to zoom who
- 27] to understand why
- 28] to add what
- 29] to view what
- 30] to entertain what
- 31] to pity who
- 32] to get attacked how
- 33] to knew when
- 34] to know what can be
- 35] to analyze what could be
- 36] if not then when
- 37] what is to be
- 38] what is to be was be before
- 39] what has been
- 40] what could be
- 41] what is to be but
- 42] what could be and won't be
- 43] if Now then what again
- 44] if not now when
- 45] what is but will not be
- 46] what can be said to be but won't be

47] to be

48] to be but

49] to be but when

50] when is but how

We have looked at all critical questions that are needed to effect change and the move from earth to heaven or hell

Now if we ask where I will go this is the rely the creator assigns

dxrtuvwxyztertaxtruvwxarvidgomadza.ya.human.reply.all

If we check what this does it makes David be able to read all brains on earth

[To be confirmed later]

If we Ask ourselves what could be in regard to reading the brain then can anyone read the brain the answer is yes just be in a position to understand things

If we check what can be then we can see that we can add a ntrstuvwxyz to ntrstuvwxyz and make this universal so that anyone even without Yahweh image can read the brain

If we Ask what can be then I [David] can be what i [brain] can be and I can be what I can be.

Now let's see why I am powerful because no one has ever found the image of God

No one has ever created the afterlife than me on 0708984328BC according to .Ya

[created by

dxrtuvwxyztertaxtruvwxarvidgomadza.ya.human.afterlife.all

If you ask me why this is the answer humans can live here on earth as well in spirit form

Ya upset stststrystystptyaty that translate to problems of harvesting silkpasty

Now let's Ask other useful questions

If I can live forever what would it be then it would to disable the death switch using code nxt005 this will remove the death switch for humans from activation but they will still die but without knowing it meaning they can easily say death and death will be initiated instantly instead of what happens now

Detailed death sequence

Onsetofdeath.start

Ifdeathstart.start.now[]

Onsetofdeathstart.now

Ifonsetofdeathstartthenask.whynot

Ifwhynot.start

Then sendallinformationtotinboxes123456789 located in the tinybox areas

1. Lumbar
2. Lungs
3. Ribs
4. Anus
5. Ears

6. nose

7. Voice chords

8. Fingers

9. Eyes

Now if we Ask why this is this is because these tinyboxes will collect all vitals just before death and let xrtxyrtyrtywyx collect these which are translated as tiny masters that moves lightning fast

Now once that is done the body will ask itself a lot of questions based on these boxes

1 have all the boxes collected and it uses a checksum digit system where if a box has been checked the key should start with a 6 for example if unchecked with a 7 just for example

If we are to ask why these tinyboxes this is the answer tinyboxes are predefined self regulatory system just to feed the basic like raw data and for the box to process if all information will be stored in accordance to order information if we are to ask then this is the reply information is needed during and after death to close reset systems and prepare for spirit.ya

Ya created system.ya in order to consume the Souls [acetate.aletetete.acetate.find.now]

If we Ask then this is the answer Ya must fulfill creation but I'd like to start a new era

Now let's look at the equations involved
