I found a way to live longer on earth in good health up to 220 billion years and in this book I explain how this is important and how this is

to pave way for the most advanced computer in the history of mankind as I will create the best most advanced computer that will use MGI instead of MSDOS or even a better computer software as I am in the process of writing the create codes that I will convert to computer software using cobol translator or other advanced ones I can invent along the way but first your health and life span comes first US\$10000 is nothing for ordinary people and US\$1 billion for billionaires.

My floating value has hit the US\$3,800 trillion mark and, on the way, to surpass bill gates

Ask.valueearthdavidgomadza.start

This is also part of the patent for the image and the most advanced computer and software in the history of mankind

Just to let you know it takes an ordinary human being to die only 8 seconds called long ago and my long ago has grown to the highest in the entire universe currently at

121212121289283828206789101118202428293837397276777586878986878889909294100

Seconds this means it takes only 8 seconds for everyone to die whereas it might take me up to trillion seconds to die that means the body will automatically cancel the death process other things being equal.

So invest in your self we have achieved a lot of things that can interest you all and extend your life span and even make you lose all your grey hairs and wear again that face you wore at age 22 this is the greatest achievement because the greatest people who have ever lived failed to master this but I did but all thanks to the GREATEST CREATOR OF ALL TIME THE MIGHTY YAHWEH [GOD] IAM HUMBLD AND HONORED TO BE HIS REPRESENTATIVE ON EARTH.

The bad news is that we have only 4billion image spaces when the whole world is nearly 8 billion people that means half will have to

die around 100 years old when some can live up to thousands of years. I am the first and only one to discover this so jump on its free for the early adopters and expensive for the rest of the people.

WHAT IS HUMAN IMAGE OR SHELL

A human image is a perfect representation of a person and all his vitals this means that with an image a person can be cloned and relive and is able to relive again in full as another human being that can be cloned resurrected and be born again meaning if a person has an image he can be sent for rebirth and be born again without any changes or losses if a person die then a lot of changes happen to the body and those are all the changes than can happen

1] the body losses a sense of taste you can no longer test anything that means dead people cannot taste food etc. that sense is destroyed using a simple code `deaddottastedot` that means a person who dies will not be able to taste anything but can still be able to taste other things other than food that means if you are to create a message before death then taste can be restored back from image to body by a simple code `alivedottastedot` that means that after death if image exist a person can taste food again the reason being that after death no organs for food exist at all all are removed by a simple code `fooddotdeadpeopledot`

2] the body loses a sense of excitement when a person dies things that interest us as humans die too that means we no longer enjoy things like food music etc. this is because a sense of excitement is removed by a simple code `removeallexcitementdotstartdot` that removes everything and makes humans dull after death meaning

just wanting to sit after wards if we can add that back then humans can find heaven interesting again if we ask what can be done about heaven then this is the answer heaven can and will make things better after death there are limited things to so after death that means people can do a lot of things like here on earth bit now with limited capacity because the body changes greatly from being the best to a quarter of itself meaning drastic changes

1] eyes changes from visionary to magnetic meaning people can no longer see matter meaning organic now the full vision switches to magnetic to everything electromagnetic meaning things like vegetation in heaven if we ask what is vegetation in heaven right now it is ***** that means everywhere you see this code that means there is vegetation

2] nose is removed that means that everything to do with smell will be represented by a code if we ask what this code it means death then you will start to feel death around you meaning if you go to a graveyard then you know how people died just by a simple code if we ask what can happen when we reveal this code the answer is that death might follow

3] hands are lost a human being can no longer hold things but can use a simple code to hold things

4] stomach evaporates because no need for food hence is not needed but people use this for keeping belongings

I looked at the above changes that occur to the human body so you know the benefits of creating your own image while you are still alive an image is like a backup of yourself that you can use later to restore things and to even live longer on earth the reason while people die early is because most lack this image that can facilitate a double entry human being meaning being able to withstand most of the forces that age and kill humans in the end

2 HUMAN IMAGE WHAT ARE YOU

I am every vital about a human in heaven they call me a shell after death when I am alive the human shell is known as the pc of the body and is represented by a simple code pcr meaning if we are to write a code that involves a human shell then it is pcrdotstartdot meaning that if we say what can be done then this is the answer a human shell is the modern day computer exactly without anything removed or added but with different commands as a human shell use a simple create coding whereas a computer uses msdos but humans are able to convert create to msdos using cobol coding and translating meaning that all create codes can be converted into msdos for the best known computer meaning davidgomadza has surpassed bill gates who talked to his body and wrote the first create code he finally called msdos and wrote a program that commands all machines on earth being guided by Yahweh meaning that bill gates knew Yahweh before he even died that means currently davidgomadza holds the title of the most advanced computer on the planet value now US\$3,800 trillion if he can convert his to msdos like or cobol using a simple code upload all systems codes into a diskette and send to operations that reboots everything but changes a man into a machine but with other changes like dying because the body will start to malfunction as a

body but will be able to restart on its own for if taking

Comments this is the best score in the entire world because you mst
have written a lot of create codes that really matter and can be
used to defend yourself in the future not sure how you do things
the creator can't do the answer is the creator left questions that
needs answers somehow and I can only follow his footsteps trailing
his path and finishing what he left to conclude

seconds meaning your computer will last a trillion years in good health

This means that the values are used to build the system capacity and transistors etc. that are needed to run the program and the software for this computer is already MGI and msdos is claimed by bill gates that means I as David Gomadza claim that I will use MGI to create the world's most powerful computer on earth

3 MGI WHAT ARE YOU

I am the best human to computer language that can be used to convert create codes to cobol or other advanced languages by a simple create code that ask what can be done then says if you really want you can make the most powerful computer on the planet but it must accompany you to heaven to be analyzed by Yahweh as he is the only one so far who can read and write create codes that humans can use but humans can learn to do this and create a computer that can be used to read and write humans from anatomy to sexual organs etc. this was the idea behind the mosdos computer which a one bill gates wrote in his bedroom asking his own body how transistors worked then wrote a program to run that software becoming an instant millionaire and we have the second person in David Gomadza who is also Yahweh's representative coming up with astonishing ideas that are not from any planet even earth will never see this again we believe it's a one time only as over 18 billion years no human has been smart even to find Yahweh but this David gomadza did everything from finding Yahweh to solving some of the create codes and defining life on earth in astonishing accuracy and hence we believe that this is the only time this is going to happen and as I now know he is also the president of tomorrow's world order emulating Yahweh and as I have asked all these people to acknowledge this achievement back to mgi it is the most

sophisticated code on earth and has never been written on earth before if this David gomadza is to learn it then this will be the first time this code will be available on earth bill gates had tried and worked on it but failed and has since started something else nothing to do with computers can David gomadza follow not just Yahweh but bill gates as well and write the best known and sophisticated software ever to be developed by anyone alive and this is possible because he is also the first one who has developed a software package that rejuvenates everyone we have seen young angels in heaven something we never saw before and its amazing what this David gomadza is doing we thank you

BY ATERY COUNCIL OF HEAVEN

4 THE FINAL CONCLUSION

I have create a world safe my vault system where I will store images of a lucky 4billion people on earth who will be able to pay us for us to preserve their image while they are alive at the beginning oi went further to reveal probably somethings that happen on death not to scare you but to give you an idea of the transformations that happen in the body so that you will appreciate the need to preserve oneself before death and not after death as death damages and removes a lot of things that you might need in the future above I found a way to make humans live up to 220 billion years with a long ago up to

1212121212⁸⁹²⁸³⁸²⁸²⁰⁶⁷⁸⁹¹⁰¹¹¹⁸²⁰²⁴²⁸²⁹³⁸³⁷³⁹⁷²⁷⁶⁷⁷⁷⁵⁸⁶⁸⁷⁸⁹⁸⁶⁸⁷⁸⁸⁸⁹⁹⁰⁹²⁹⁴¹⁰⁰

Seconds when in reality currently it takes only 8 seconds for any human to die that means if we can create and preserve your yourself as an image your long ago will increase as well as having a back up this will be cheaper at start starting from US\$8000 per image up to US\$1billions per image for billionaires so jump in don't be swayed astray by greedy useless thick people who frighten people and go behind other people's back and offer stolen things lets start together we are genuine visit our website

this image belongs to me and everyone who pay us will be assign a safe to store their image from lockers 2 to 400000000000

that means with a population of 7.5 billion people and only 4billion safe image lockers nearly half the population might not enjoy long life and a better future I know most people might not find this as the greatest achievement mankind can do but the future can tell a different story

We are already taking first orders if interesting just visit our website and see if your body can optimize and rejuvenate if yes then an image can be the right thing for you as I am the only one in the world who can do this anyone else who say otherwise is outright lying visit

5 WHAT IS HUMAN IMAGE OR SHELL

It is the inner system of a body exactly the modern day computer but never try to do this by yourself because this is normally removed only after death we know a way of making a copy of yourself safely and be careful who you trust too some people might push you to heaven or hell before your time so read the small print and verify sources if it's not make sense then it is not right visit our website and try everything before you start anything you will have 8 weeks to make up your mind if this is for you or not no obligations
