PAPERBACK ISBN: 9798860086272

We decoded the brain and now DNA sequencing.  
The two important languages of the brain and the  
body respectively. Above all we have decoded God,  
the planets and the universe.

That means we can solve any problem on earth.

Yes! Only us.

Possibilities are endless.

## **DEDICATION**

The Future.

## Table of Contents

How To Decode God, Creation, Tree of Life, Angels & Demons, The Devil, The Afterlife, The Underworld, The Brain, The Planets and The Universe .....	i
The Beginning .....	6
We decoded the brain.....	7
Solving God's Dilemma.....	11
But why would God want humankind to solve God's Dilemma?	
When can he easily create a man out of a stone to do what he wants?.....	13
But why would God forbid this if humankind will leave forever? Is this not in contradiction with solving God's Dilemma?.....	14
But why is solving God's Dilemma so important?.....	15
What is the tree of life? .....	15
Mankind's Eternity.....	19
Can a human-being be God? .....	19
Removing Human Limitations to be in God's Shoes.....	20
What is the relationship of the universe to God?.....	20
Who is God and what is he made up of? .....	21
Earth and its position and function to God.....	21
Do you know that the language of the brain is electromagnetic waves? .....	22
The Planets and Stars as God's organs.....	25
The Sun.....	25
Characteristics of the brain as the Sun acts as God's brain.....	26
Venus.....	26
Characteristics of Venus.....	26

Characteristics of the human heart as Venus acts the same as God's heart .....	27
Pluto.....	27
Uranus.....	27
Characteristics of Uranus.....	27
Characteristics of the calf leg muscle as Uranus acts as God's strength and relaxing organ. ....	28
Rotating Axis.....	28
Mercury.....	28
Characteristics of Mercury.....	28
Earth. ....	28
Saturn.....	28
Moon.....	29
Neptune.....	29
Characteristics of Neptune.....	29
Similarities between Neptune and the lungs in a human body. ....	29
Characteristics of Seraphim's and why they might be associated with Neptune.....	30
Mars.....	30
Mankind Must Solve God's Dilemma.....	30
To live forever therefore is for humanity to establish settlements in all connections that make the tree of life. ....	31
When God thinks about humanity's eternity or living forever. ....	31
God is thinking about the possibility of humanity's eternity.....	33
God's own eternity. ....	33
Possibility of Humanity's Eternity. ....	35
How God thinks. God's thinking process.....	41

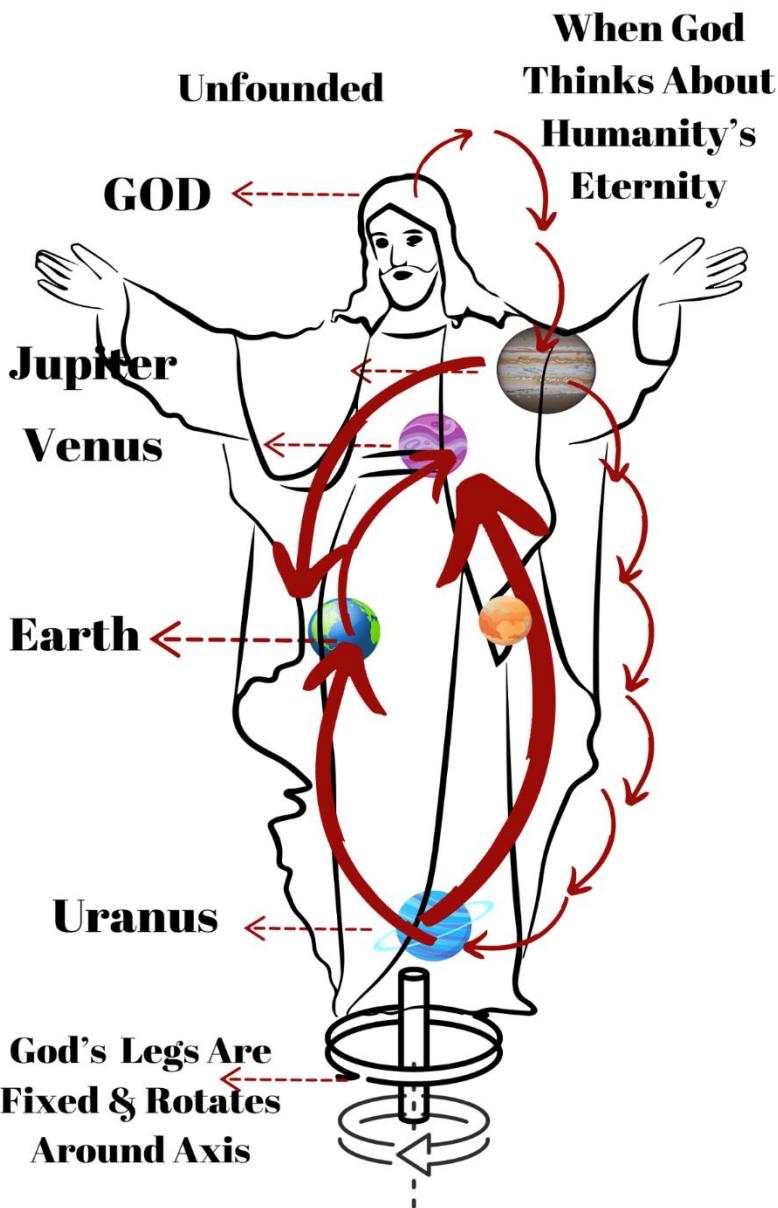

God uses planets as part of his brain and thinking process. ....	41
God's thoughts about man.....	41
God's thoughts about a woman. ....	42
God's thoughts about creation.....	48
God's thoughts about the souls of the dead.....	48
God's thoughts when thinking about heaven. ....	48
Now let us look at God's thoughts about hell. ....	48
Life in the universe as a mirror image of something else in the universe. ....	49
The Tree of Life. ....	61
The Tree of Life from God's point of view.....	62
God's Thinking Process in Detail and Man's Thinking Process in Detail. ....	67
Uranus as a God's thought duplicating, twinning, cloning or doubling planet. ....	67
Pluto. ....	67
Pluto as a 'diverging diode' of God's thoughts.....	68
Cloning or Duplicating of God's thoughts. ....	70
A perfect example is when God thinks about humanity's eternity.	72
Deoxyribonucleic Acid [DNA] .....	75
Ezekiel's Vision of God as our basis for explaining human DNA and God. ....	78
As on Earth as In Humans as It Is in Humans. ....	79
First some basic facts and inferences. ....	80
Rules of DNA Sequencing I have developed that will enable us to decode DNA. ....	81
A start. ....	81
A stop. ....	81

How to reference Chromosomes. ....	82
Take hands for example. These are known by the body as CTCCTGATGATT. ....	84
This is the name for Hair using DNA sequencing as understood by the body= CCATGCATGACT.....	84
The Top 9 Amino Acids for Hair Growth and Where to Find Them .....	85
Female breast growth first. ....	88
Male Penis Growth Supplements. ....	90
Male Penis Growth Supplements. ....	91
Is there proof of this on the internet?.....	92
The body understands life as a DNA sequence CCCTAGTAGGTA. .....	94
STOP codons. ....	94
The body identifies aging as CCCTATACCGTA. ....	95
What are the essential amino acids for old people?.....	96
Function or intended result sequence. ....	12 letter DNA 98
But God is known by a different name than God as Yahweh in the Hebrew language. ....	102
..... To Be Continued in Volume II of The Book.....	103

## **ACKNOWLEDGMENTS**

A big thanks to Tomorrow's World Order.

## CHAPTER ONE

You will be surprised how God; the planets and the universe are all related even to humans. There is truth in the saying that.

As On earth as in Heaven and as In Humans. What if I tell you that the planets are God's vital organs? Jupiter for thinking, Venus for creation and Mars his voice.

Imagine knowing exactly how the body uses DNA to create proteins that are used to create life? I think this will be worth \$trillion of dollars. It is like having the manual used to create every part of your body and the DNA and protein needed to create, rejuvenate, rebuild, and repair your body. Imagine the possibilities and doors this opens? Now picture a scenario where you are given the manual used to create you. Exactly ingredient by ingredient. Imagine being told how to increase the size of your breast which you are not happy about? Now imagine increasing the size of your penis the

way you like. If everything on you is created and can be maintained by the correct DNA protein sequence surely, would you not want to get your hands on this manual?

Now I am giving you that chance. Just read all our publications and decide for yourself.

There is a lot of information that all this information cannot fit in one book. Therefore, read volume one and look at other referenced materials while waiting for Volume II.

This is what comes in Volume II.

Detailed DNA sequence analysis in detail with proof beyond doubt. A genuine guide to real proteins and products that improve life. I think most people must agree that enough is enough. It is time human life is put first as the way things should be. I have all the answers to exactly what you will need to see great results in every aspect of life. This is because we are speaking the correct language of the.

A] Brain. We decoded the brain, and our brain commands reverse a lot of harmful effects. Our brain codes work because we are speaking the exact language of the brain. We do not guess. We will tell you the truth.

Visit our shop [www.xcodes.shop](http://www.xcodes.shop)

You must buy or try free ones, even on your pets, to see if this works.

B] Now we speak the DNA language and tell you exactly what protein combinations you will need to see great results. The reason being that this is the

code used to make, hair, penis, breasts, nails, skin, hands, muscle etc. So, a combination in the correct sequence of the protein is what will get you real results. Stop giving people reasons to lie to you. Get the facts right; buy our books. I have included a lot of links for you to read while waiting for volume 11.

Visit our website [www.twofuture.world](http://www.twofuture.world)

C] Detailed analysis of the Tree of Life.

D] Angels and Demons.

E] The Devil.

F] The Afterlife

G] The Underworld.

You will never find the information we publish anywhere else.

You Can Count on Us on This.

Buy this book today!

## **Pluto as A Diverter of God's Thought and Uranus for Duplicating God's Thoughts**

**When God Thinks About Humanity's Eternity**

## [Genesis 3v22](#)

### [New International Version](#)

And the LORD God said, “**The man has now become like one of us, knowing good and evil. He must not be allowed to reach out his hand and take also from the tree of life and eat and live forever.**”

**26** Then God said, “Let us make mankind in our image, in our likeness, ...”

**27** So God created humankind in his own image,  
in the image of God he created them;  
male and female he created them.

## [Genesis 2v7](#)

Then the LORD God formed a man<sup>[c]</sup> from the dust of the ground and breathed into his nostrils the breath of life, and the man became a living being.

## [Genesis 2v16](#)

**16** And the LORD God commanded the man, “You are free to eat from any tree in the garden; **17** but you must not eat from the tree of the knowledge of good and evil, for when you eat from it you will certainly die.”

## The Fall

**3** Now the serpent was craftier than any of the wild animals the LORD God had made. He said to the woman, “Did God really say, ‘You must not eat from any tree in the garden’?”

<sup>2</sup> The woman said to the serpent, “We may eat fruit from the trees in the garden, <sup>3</sup> but God did say, ‘You must not eat fruit from the tree that is in the middle of the garden, and you must not touch it, or you will die.’”

<sup>4</sup> “You will not certainly die,” the serpent said to the woman. <sup>5</sup> **“For God knows that when you eat from it your eyes will be opened, and you will be like God, knowing good and evil.”**

<sup>6</sup> When the woman saw that the fruit of the tree was good for food and pleasing to the eye, and desirable for gaining wisdom, she took some and ate it. She also gave some to her husband, who was with her, and he ate it. <sup>7</sup> Then the eyes of both were opened, and they realized they were naked; so, they sewed fig leaves together and made coverings for themselves.

## The Beginning

<sup>1</sup> In the beginning God created the heavens and the earth. <sup>2</sup> Now the earth was formless and empty, darkness was over the surface of the deep, and the Spirit of God was hovering over the waters.

God is the creator. He is eternal meaning that he has no beginning or an end. He is omnipotent, omniscient, and omnipresent. God is the creator for the argument of this book.

My belief is since any intelligent design in creation and nature can only be explained by a super creator. What are the chances of life forming as it is just by coincidence? All life is an intelligent design of some form. They are based on intelligent programming that hints to some super intelligent creator. The chances of things working as they do coincidentally is

unfounded.

We decoded the brain.

That means we can decode the brain and thoughts of all creatures on earth and in the whole universe. We can time travel to any time in the past and to some extent to the future. To some extent we can go back to the beginning even to creation itself.

I am not saying that I am God or can fit God's footsteps, no.

I am saying that decoding the brain has enabled us to do things considered impossible now.

## CHAPTER TWO

### Solving God's Dilemma.

Just like humans spend \$billions trying to make a robot that acts the same as a human. God created humankind to see if humanity can step in his or her shoes and do as he or she do. [Going forward when I refer to God, I am referring to him as both he and she.] Not to replace him but to be his protégé who will take dominion over all earth just like God takes dominion over the whole universe.

Therefore, God's Dilemma is God's frustration in trying to find a human being that will be as good as him. One who will act and think like him. One who he will delegate such tasks to here on earth.

Solving God's Dilemma means creating the World's-First powerful leader [just to let you know this position is filled already. I am that leader now. I worked hard to decode life and the universe.] One to rule the entire world based on the idea that God created humankind so that he walks in his footsteps bringing all humankind together as one world.

But God knows that humankind is bound to fail due to his nature. Humankind is attracted to sin as if his DNA was the devil's

DNA. I postulated the idea that even though God created humanity with his image the soil he used had the devil's DNA. That means no matter what God does humankind is bound to refuse to listen to him but will choose to listen to the devil. Read the Fall of Man as the devil hiding behind the snake deceived Adam and Eve by making them eat the fruit therefore, disobeying God.

So as a rescue mission God sent his Son, born of a human even though the pregnancy was by the divine spirit. His name was Jesus who was to show humanity how to solve God's Dilemma by acting and becoming like God in order to solve God's dilemma. Even then humanity still disobeyed God and instead got his son Jesus killed. Jesus was a man like all humanity, and he was to show humankind how to solve God's Dilemma. Still humanity failed to listen therefore failed to solve God's Dilemma.

But it is not as simple as just saying I want to be God's protégé and solve God's Dilemma. It is about passion about God in order to understand him. It is about understanding his messages and above all it is about solving all the puzzles. It is like a test. God is not simply going to say if you want to be like me, you do this and this. No, it is about knowing God that much that everything seems clearer. It is all about understanding the human brain. The best thing is that the bible tells you that God created humankind by his image. So, understanding humankind gives hints about God himself. This is because, As on Earth as In Heaven as In Humans.

Read this book as well. I authored this book regarding the Egyptian pyramid of Giza. But the concept is the same.

[https://play.google.com/store/books/details/](https://play.google.com/store/books/details/David_Gomadza_As_On_Earth_As_In_Heaven_As_It_Is_In?id=I1rPEAAQBAJ&hl=en)  
David\_Gomadza\_As  
On\_Earth\_As\_In\_Heaven\_As\_It\_Is\_In?id=I1rPEAAQBAJ  
&hl=en

But why would God want humankind to solve God's Dilemma? When can he easily create a man out of a stone to do what he wants?

Most people would think that God does not want humans to be like him and can quote a passage from the bible itself where God forbids humans to imitate him.

3 John 1:11 - Beloved, do not imitate what is evil, but what is good. The one who does good is of God; the one who does evil has not seen God.

Ephesians 5v1

Imitate God, therefore, in everything you do because you are his dear children.

Part of the commandments.

Thou shall not make unto thee graven image of God...

Does God want humans to evolve to his level at least to take care of things here on earth? What God forbids in the bible is the emptiness imitating God without the right understanding and substance needed to represent God. What is prohibited in the bible is tarnishing God's name with no proper devotion.

Somehow it seems that God had a plan for humanity. A road he wanted humankind to take. One he had chosen to make sure that the people remained sinless and pure. But we know too well what happened in the garden of Eden. The devil in the form of a snake deceived Adam and Eve to eat the forbidden fruit.

But in fact, this is what opened man's eyes to know what is good and what is evil as God himself acknowledged.

Genesis 3v22

New International Version

And the LORD God said, "The man has now become like one of us, knowing good and evil. He must not be allowed to reach out his hand and

take also from the tree of life and eat and live forever.”

So, God is not against the getting of wisdom but how Adam and Eve got the wisdom. This is because even God acknowledged that humankind has become like him as now, he knows what is good and what is evil.

God went further on in the same verse Genesis 3v22 that Mankind must not be allowed to reach out his hand and take also from the tree of life and eat and live forever.

That means that unless humanity eats fruits from the tree of life he is doomed. This is because the tree of life gives humanity longevity to live forever.

**But why would God forbid this if humankind will leave forever? Is this not in contradiction with solving God's Dilemma?**

What God was against then was humankind taking short cuts as advice given by the snake. God is not against making knowledge and living forever. No. He is against the shortcuts humankind is taking through the devil. What is in it for the devil? God might ask. Forever sin and betrayal. Satan is bribing humanity with sweets in the form of tips in order to sink them in sin and death. This is what God is against.

God wants humanity to solve the puzzles himself without any help from the devil. The devil as he knows him will trick his people in the end. His fears are that humanity will gain eternity to live forever using the devil's stencil tainted with sin.

It is like a student who cheats his way past the examination. Surely whoever sets and marks the test, even if the student passed, will make him a failure once he or she knows that the student cheated. That is not the way this works. So, humankind must be driven out of the Garden of Eden and a cherub with a flashing sword be put on the east side so that humankind will

not return and ask the devil for tips. He must be separated from the snake and cast away so that he thinks for himself and solves God's puzzle.

But why is solving God's Dilemma so important?

1. To live forever humankind must solve God's Dilemma on his own without the help of the devil.
2. Humankind must know what the tree of life is by himself without the help of the devil.  
According to Genesis 3v22

#### New International Version

And the LORD God said, “The man has now become like one of us, knowing good and evil. He must not be allowed **to reach out his hand** [like Oliver twist begging the devil for tips] and take also from the tree of life and eat and live forever.”

What God is against is for the couple to stretch their hands and ask the devil for ideas in order to live forever.

They must solve all the puzzles themselves away from the snake and devil. Hence, they must be prohibited to return anywhere near the devil in the snake.

But the fact remains that knowing the tree of life and taking from it is the only way to live forever.

**What is the tree of life?**

Background information from Wikipedia.

*The tree of life is a fundamental [archetype](#) in many of the world's [mythological](#), [religious](#), and [philosophical](#) traditions. It is closely related to the concept of the [sacred tree](#).<sup>[1]</sup> The concept of the tree of life may have originated in [Central Asia](#), and was absorbed by other cultures, such as [Scandinavian mythology](#) and [Altai shamanism](#).<sup>[2]</sup>*

The [tree of knowledge](#), connecting to [heaven](#) and the [underworld](#), and the tree of life, connecting all forms of creation, are both forms of the [world tree](#) or cosmic tree,  
[3] and are portrayed in various religions and philosophies as the same  
[4] tree.

[Wikipedia](#)

### In Christianity

The tree of life first appears in Genesis 2:9 and 3:22-24 as the source of [eternal life](#) in the [Garden of Eden](#), from which access is revoked when man is driven from the garden. It then reappears in the last book of the Bible, the [Book of Revelation](#), and most predominantly in the last chapter of that book (Chapter 22) as a part of the new garden of paradise. Access is then no longer forbidden, for those who "wash their robes" (or as the textual variant in the King James Version has it, "they that do his commandments") "have right to the tree of life" (v.14). A similar statement appears in Rev 2:7, where the tree of life is promised as a reward to those who overcome. Revelation 22 begins with a reference to the "pure river of water of life" which proceeds "out of the throne of God". The river seems to feed two trees of life, one "on either side of the river" which "bear twelve manner of fruits" "and the leaves of the tree were for healing of the nations" (v.1-2). [9] Or this may indicate that the tree of life is a vine that grows on both sides of the river, as John 15:1 would hint at.

[Pope Benedict XVI](#) has said that "the Cross is the true tree of life."  
[10] [Saint Bonaventure](#) taught that the medicinal fruit of the tree of life is Christ himself.  
[11] [Saint Albert the Great](#) taught that the [Eucharist](#), the Body and Blood of Christ, is the Fruit of the Tree of Life.  
[12] [Augustine of Hippo](#) said that the tree of life is Christ:

[Wikipedia](#).

### In Jewish sources.

The tree of life is mentioned in the [Book of Genesis](#); it is distinct from the [tree of the knowledge of good and evil](#). After [Adam](#) and [Eve](#) disobeyed God by eating fruit from the tree of the knowledge of good and evil, they were driven out of the [Garden of Eden](#). Remaining in the garden, however, was the tree of life. To prevent their access to this tree in the future, [Cherubim](#) with a flaming sword were placed at the east of the garden.  
[28]

[Wikipedia](#).

# The tree of life represents; -

1. Connections. The circle of life is a connection between earth and the heavens.
2. Strength. The more connectedness the strength.
3. Growth. The better the connections the better the growth.
4. Rebirth. Growth and adaptation can mean forever rebirth.
5. New life. The more connectedness the more chances of new life.
6. Tranquility. The better the connection, the calm and tranquility.

In my novel series Evelina.

[https://play.google.com/store/books/details/David\\_Gomadza\\_EVE\\_LINA?id=C3P3DwAAQBAJ&hl=en](https://play.google.com/store/books/details/David_Gomadza_EVE_LINA?id=C3P3DwAAQBAJ&hl=en)

I explained why humanity is doomed unless it solves God's Dilemma.

Humankind is doomed because humankind has failed to decode what is the tree of life. From its name it means that for humanity to exist forever he must understand what the tree of life is and take from this tree in order to live forever. Unless humanity completes the tree of life, he has no eternity.

The tree of life gives humankind the ability to live forever. So, it is as simple as finding the tree of life then living forever.

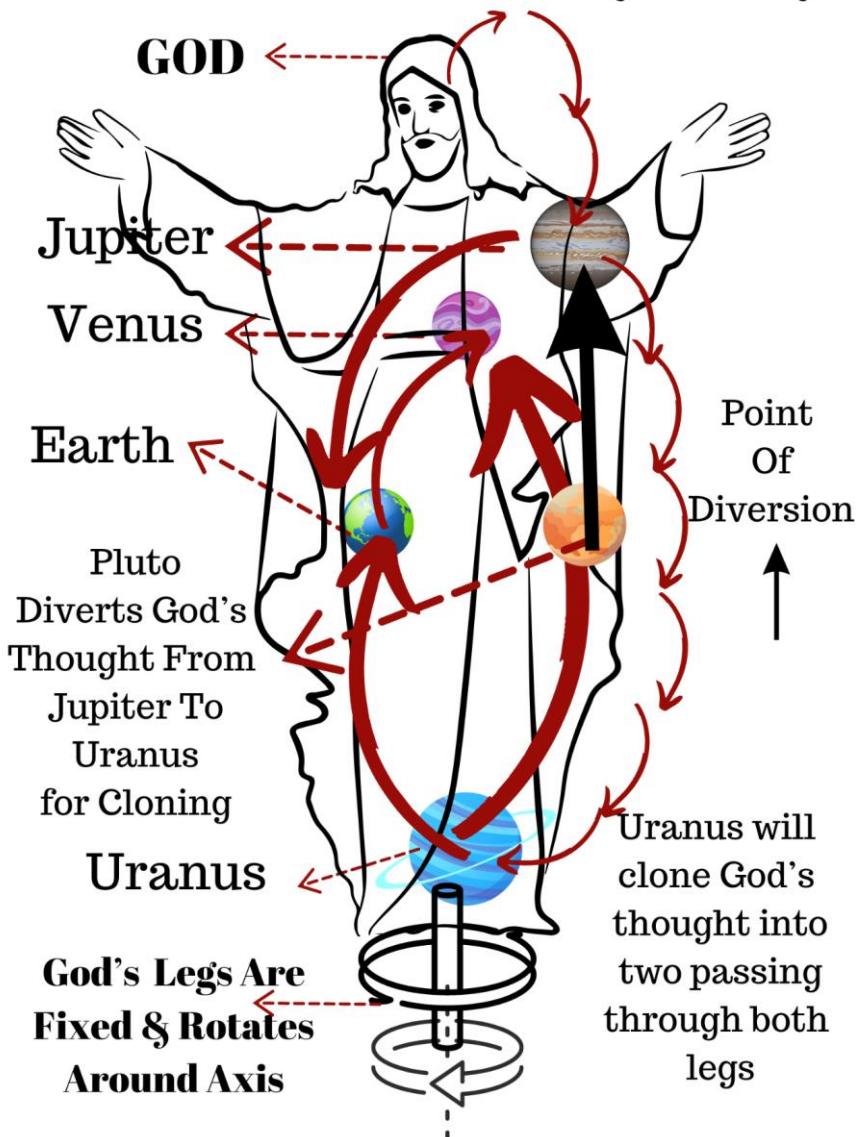

Good News to All Mankind.

I have decoded the tree of life.

It means exactly what it says. The tree of life.

## **Pluto as A Diverter of God's Thought and Uranus for Duplicating God's Thoughts**

**When God Thinks About Humanity's Eternity**

## Mankind's Eternity.

God created the earth for humanity. But for humankind to have longevity he must decode what the tree of life is and complete it. If humanity sticks to earth. He will never have eternity. He will never live forever. The tree of life makes humankind live forever.

Earth is not enough to give humanity eternity.

God's plan was to make humanity live forever here on earth only if humanity had listened to him. But we know too well that the devil did not want that. The devil would be rendered useless if humankind were to listen to God.

Humans must prove that they are smarter enough to solve God's Dilemma.

What is the tree of life?

Instead of answering this question I will throw another question that will make all this make sense. Who is God?

Who really is God.

God is the creator of the universe and humans.

What is the relationship of God to humans?

God created humans by his image. Meaning to some extent we look like God.

## Can a human-being be God?

God created humankind by his own image. It follows that humankind if he uses God's stencil, he can to some extent become like God. But you must understand that humans are humans because they have limitations put in place according to human standards.

If a human excels and understands God and his purpose this person will be able to remove these human limitations to some extent to fit God's stencil.

Humans have limitations based on what they can be and cannot be. Like size. God's size is much greater in that God can cover the whole universe whereas humans cannot. Humans have other restrictions like the ability to fly, or time travel, and lack the ability to know other creatures' thoughts. All this, among other things, limits humans' ability. So, they cannot be like God. But decoding the brain makes most of these attributes possible. Decoding the brain can make a human being time travel even to space, to heaven, to hell etc. Decoding the brain makes the knowledge of creatures' thoughts possible.

Above all, decoding the brain enables one to step in God's shoes or any creatures' shoes to become God and that creature in that you will feel God or any creature just as they felt. You can step in God's shoes and feel creation. You can even remove any limitations that prohibit one becoming another creature.

### Removing Human Limitations to be in God's Shoes.

Experience can make you temporarily or forever remove human limitations so that you feel angels, seraphim, cherubim and even God.

### What is the relationship of the universe to God?

I know this is the early days but decoding the brain has enabled us to understand the relationship between God and all the planets.

The planets and stars; all of them especially these; the sun, Jupiter, Venus, mercury, Neptune, Pluto, the moon, Uranus, earth, and mars are all organs of God.

Yes, all these make up what God is.

Our brain code enabled us to detect that God and the planets are one. In fact, they are all vital organs of God.

That means these planets play extremely critical roles in the life and existence of God.

## Who is God and what is he made up of?

God is a three in one powerful God who is the Father, The Son, and the Holy Spirit.

God is the trinity. He is a three in one God. God is everywhere. He is in all the universe. Above all the planets and stars like the Sun, Mercury, Jupiter, Uranus, Venus, Mars, the Moon, Earth, Neptune, and Saturn are all his vital organs or parts of this body for specific functions. That means that God needs all the planets all with their distinct characteristics for his existence.

God does not have legs as we might think of legs on humans. To cover the whole universe God's is floating straight in the atmosphere horizontally with his legs joined together with an axis in the center to enable rotation against an axis. In other words, God's big toes are joined together. The heels are joined together leaving an empty part in the middle for the axis rotation.

See below image of God.

In the bible God is the father, the Son, and the Holy Spirit.

The bible also says that Jesus Christ was the Son of God and God himself as well. The bible depicts Jesus as risen to heaven after being nailed to the cross. Look at how God is depicted by Jesus' image on the cross. Look at the legs. They are fixed and joined together. He rests suspended on the cross. Even though vertically in real life he floats in the air.

## Earth and its position and function to God.

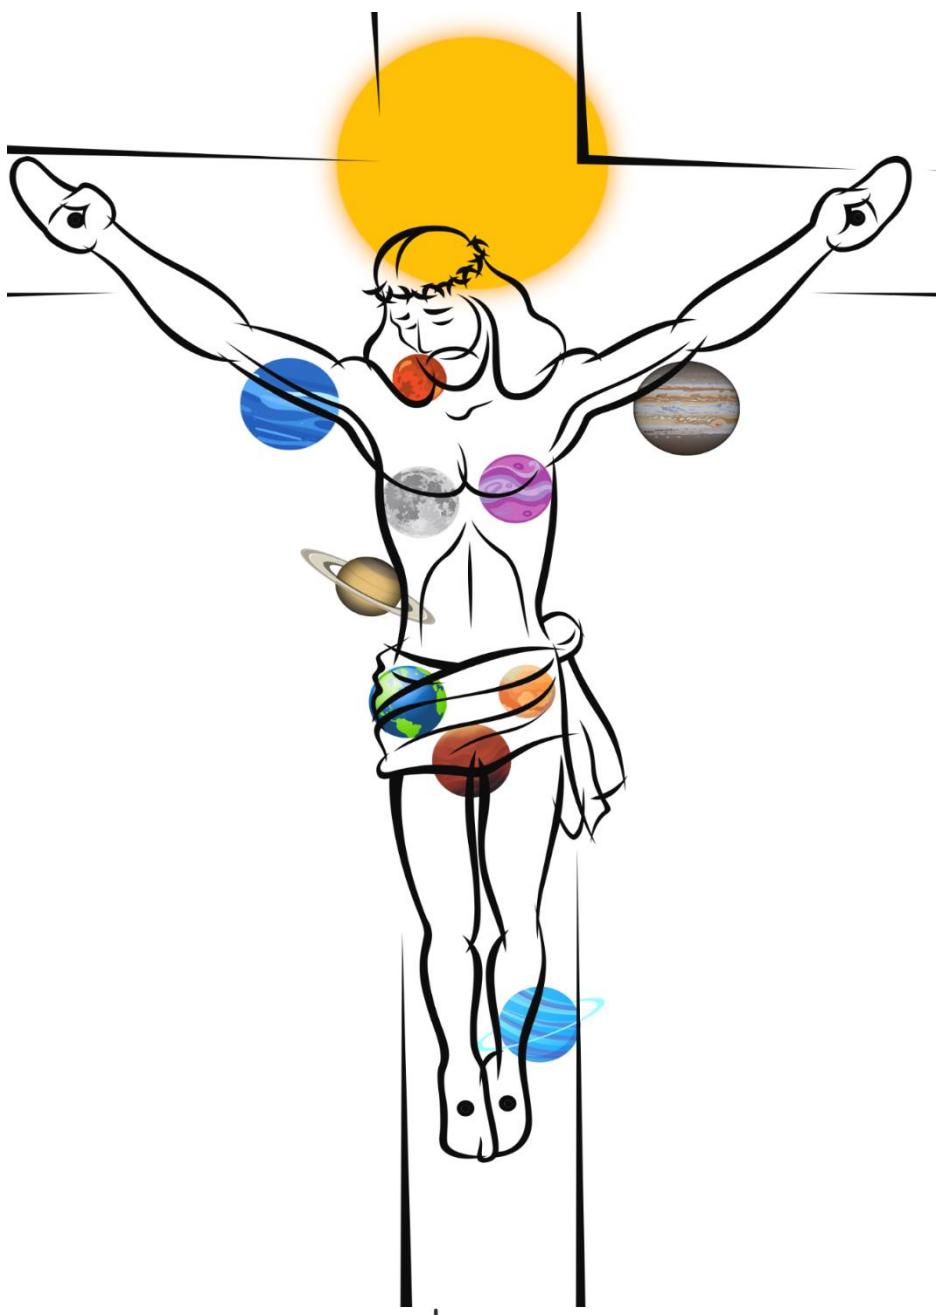

Earth is the power for God's rotational properties. As earth rotates it powers God and the whole universe. Earth is at the center of the universe and or at a position that makes God rotate around the universe. Earth rotational properties create a magnetic field that enables God to hear people's thoughts and prayers.

Like I said at the beginning; God created humankind by his image. If we are to put a 'small earth' with its rotational characteristics with a strong magnetic field this will enable man to be exactly like God meaning having the ability to listen to God and all creatures literally. Humanity will be able to hear all other creatures. This is because earth's rotation creates a magnetic field that enables all

creatures to communicate at the frequency of creation. A magnetic frequency level of 440 Hz enables all creatures to magnetically feel each other.

**Do you know that the language of the brain is electromagnetic waves?**

God's asking for humankind to worship him in a prostrate position down and kissing the ground is all symbolic in that this is what in theory will increase earth's rotation given that earth is on God's back hip bone.

It can be said that the father and the Son and the holy spirit are all perpendicular to each other. God the Son has his legs fixed and is vertical. Whereas the father is floating lying vertical in the air with the Holy spirit joining the two to form the trinity.

## CHAPTER THREE

The Planets and Stars as God's organs.

*The most recent [definition of a planet](#) was adopted by the International Astronomical Union in 2006. It says a planet must do three things:*

1. *It must orbit a star (in our cosmic neighborhood, [the Sun](#)).*
2. *It must be big enough to have enough gravity to force it into a spherical shape.*
3. *It must be big enough that its gravity cleared away any other objects of a matching size near its orbit around the Sun.*
4. *A planet is a celestial body that (a) is in orbit around the Sun, (b) has sufficient mass for its self-gravity to overcome rigid body forces so that it assumes a hydrostatic equilibrium (nearly round) shape, and (c) has cleared the neighborhood around its orbit.*

Wikipedia.

The Sun.

Representing God's brain, his rejuvenating organ, and powers.

This is over his head.

Jupiter. Representing God's thinking and communicating channel.

His mouth as well.

This is situated on his left shoulder.

Characteristics of the Sun.

Composed of 75% hydrogen and 25% helium.

Characteristics of the brain as the Sun acts as God's brain.

Made up of 60% fat and 40% water, protein and carbohydrates, weighing about three pounds.

The right side of the brain is for intuitive, creative, free-thinking while the left side of the brain is more analytical, verbal, and orderly.

Venus.

Representing God's heart. Eternity, Feelings and Emotions.

Characteristics of Venus.

Venus has a thick atmosphere, and its structure and size is the same as earth. It is a rocky planet.

It is the hottest planet in the solar system. It is rusty and might have active volcanoes. It rotates on its axis clockwise unlike most planets. The sun rises in the west and sets in the east which is opposite to earth.

It is the second largest rock planet.

Venus does rotate slowly on its axis. Venus orbits the sun faster than earth.

**Characteristics of the human heart as Venus acts the same as God's heart.**

The heart is a four chambered organ that pumps blood.

It is powered by electrical impulses.

The five properties of the heart.

Contractile.

Excitability.

Conductivity

Contractile

Has Nodal Fibers

This is in the same position as a human heart. Left chest area of God as man is created by God's image.

**Pluto.**

Representing God's relaxing organ.

This is in the lower central left section of God.

**Uranus.**

Representing God's strength is in the lower part of the body in the legs. It is also an organ to help God relax.

**Characteristics of Uranus.**

When it rotates it is often 90 degrees from the planet of its orbit.

Named after the Greek god of the skies.

Has the third largest diameter from the sun.

Is made up of gasses, helium, methane, and hydrogen.

It is icy and has twenty-seven moons.

Has thirteen rings.

Cannot support life.

It rotates east to west and on its side.

**Characteristics of the calf leg muscle as Uranus acts as God's strength and relaxing organ.**

Responsible for walking and running actions.

### **Rotating Axis.**

Representing God's legs that are joined at the big toes and at the heels. These enable God's body to rotate.

### **Mercury.**

Representing the position where God if he had sex organs this is the position where they would have been. But God has no sex organs. Still mercury is located where sex organs are in humans. In the middle between the legs. This also represents old memories or events to God.

### **Characteristics of Mercury.**

Fastest planet in our system.

Orbits close to the sun.

Smallest planet with solid rock surface like earth's moon with craters.

Has a thin atmosphere composed of oxygen, sodium, hydrogen, and helium.

Has no moons or rings.

### **Earth.**

Representing life, humans and rotation powered by prayers. Rotation of earth ideally powered by humanity kneeling in a prostrate state and praying power the rotation that enables God to hear Clearly every man's thought. Earth is life to God.

### **Saturn.**

Representing a diaphragm, ribs and breathing. To God Saturn represents the devil as well. Notice here that in Genesis God

created a woman from a man's rib bone. The very woman was deceived by the snake representing the devil who is in the rib area. This explains why the woman believed the snake and disobeyed God's rule not to eat the fruit.

### Moon.

Representing God's anger and memory bank for humans' prayers and sins. This is just above Saturn on the right side of the body. This is opposite Venus which is God's heart for emotions and feelings.

### Neptune.

Representing God's breathing. This planet is associated with seraphim that are the high rank angels that live forever. You will notice below that when God thinks about high-ranking angels that guard him and worship him, he will think of Neptune.

Neptune Associated with Seraphim's which are high rank angels.

### Characteristics of Neptune.

Neptune rotates counterclockwise.

Has super winds, it is dark and very cold.

It is thirty times further away from the Sun than earth and four times wider than earth.

It is not visible to the naked eye.

It takes 16 hours to rotate once.

Has icy material. Its atmosphere is made of gasses, hydrogen, methane, and atomic helium.

Has rings-arcs and five main rings filled with dust and debris.

It cannot support life of any form.

### Similarities between Neptune and the lungs in a human body.

Neptune functions the same as lungs to God.

Characteristics of lungs that make them excellent organs for efficient respiratory surface area.

A moist inner surface.

Have a large, combined surface area ideal for breathing.

Have a huge supply of blood.

**Characteristics of Seraphim's and why they might be associated with Neptune.**

Winged celestial beings.

Seraphim do not have too many eyes like Cherubim's.

The six-winged seraphs symbolize fire and are referred to as the burning ones. This could be why they are associated with a fiery cold planet like Neptune to keep them cool.

## **Mars.**

Representing God's Voice. This also is a representation of earth's death. Why God's voice? This is because that is what earth was once like, without the magic of the voice of God. God used his voice to create life through the; Let there be.... Commands. So, Mars represents what earth once was and how it will be in the end. Now I can look again at the need to solve God's Dilemma now that you understand why the planets and God's plan cannot be separated because God and the planets and the universe are one. To solve God's Dilemma humanity must first understand God's Dilemma and solve this Dilemma.

## **Mankind Must Solve God's Dilemma.**

Earth will perish one day unless humankind solves God's Dilemma. There is an impending doom brought by the nature of things that if all humanity relies on earth; one day, they will all perish. This is just nature. Mars is to remind humans once earth was and what earth could be. Humans must find the tree of life and solve it. The tree of life is a tree that bridges heaven and earth. But it is not just a matter of bridging heaven and earth. It is a tree that

humankind must accomplish and establish life. This is the only way humanity is granted eternal life. Simply because establishing life throughout this tree of life will mean that humans are guaranteed life forever.

Recall Genesis 3v22.

New International Version

And the LORD God said, “The man has now become like one of us, knowing good and evil. He must not be allowed to reach out his hand and take also from the tree of life and eat and live forever.”

To live forever therefore is for humanity to establish settlements in all connections that make the tree of life.

This is the only sure guarantee that humanity will live forever.

It is like the saying that putting your eggs in one basket is bad. Earth can easily die to become like Mars. But if humankind has established settlements on Mars, Venus, Neptune, etc. then humanity is guaranteed that it will live forever. An asteroid can hit earth and destroy all life. So, if humankind is only established on earth mankind's eternity is unfounded.

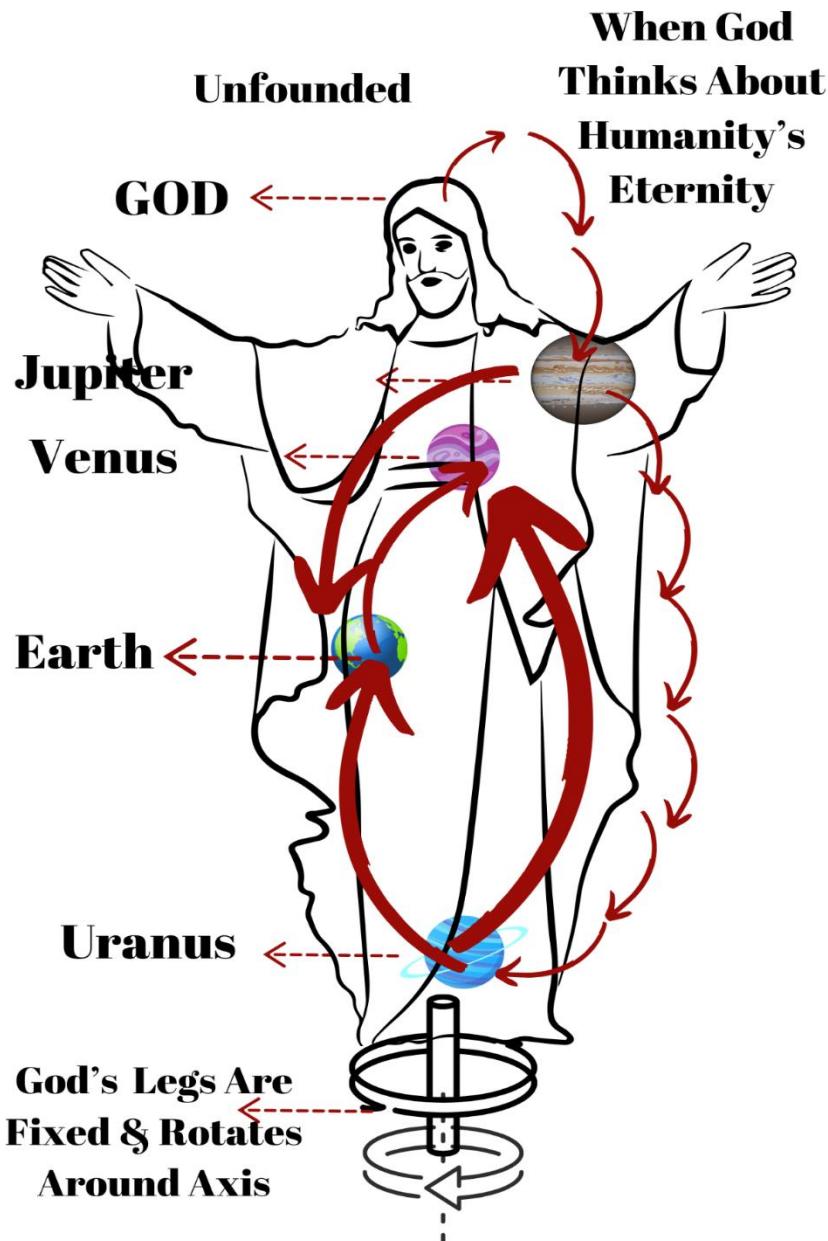

Using our brain code to decode how God will think about humanity's eternity brings a clearly unfounded result. This is because humanity is only established on earth. Jupiter is involved where God thinks about events. So, whenever God thinks about something the thoughts are emitted from his brain and sent to Jupiter. I will look at this in detail when explaining about God's thinking process below.

When God thinks about humanity's eternity or living forever.

God's thoughts are emitted from his head and sent to Jupiter first. Then the thoughts are sent to Uranus. The copy of the thoughts is sent to Venus straight skipping earth. Another copy of God's thoughts is sent to earth, from earth then to Venus.

Note here the other purpose of Uranus; as a doubling, copying, duplicating, or twining of God's thoughts organ like a planet. This thinking retains an unfounded result as life is only on earth.

Let us look at God's thinking about the possibility of humanity's

eternity, which is the possibility of humans living forever before I reveal the tree of life as God meant it.

**God is thinking about the possibility of humanity's eternity.**

God's thoughts are emitted from God's brain straight to Earth. Then from Earth to Venus.

Then from Venus to the Sun. Then from the Sun to Jupiter. Then from Jupiter to Uranus. Then from Uranus to Earth. Then from Earth to Venus. Then from Venus back to God's brain's entry point on the right side of the head.

In short, this means that humans must conquer other planets and establish life there for them to be guaranteed to live forever.

Establishing on earth alone will only mean a reverting to Mars. That is the death of humanity.

Do not get me wrong, this is not a message of doom where I prophesy about pending doom. This is different. God is simply saying nothing will happen to earth but for humanity to be guaranteed eternal life they must be established along all the branches of the tree of life. This is called the tree of life for a reason. Every connection on this tree of life is suitable for humans' life. Therefore, humanity must solve God's Dilemma and command nature through knowledge and turn the inhabitable into life sustaining planets.

It is different from the message that the earth is going to be destroyed, no. Earth can last forever but it is like putting all eggs in one basket. To guarantee existence forever humans must understand the tree of life and establish settlements along all points. This is eternity to God.

Now compare to what God's thought process is when he thinks about his own eternity.

**God's own eternity.**

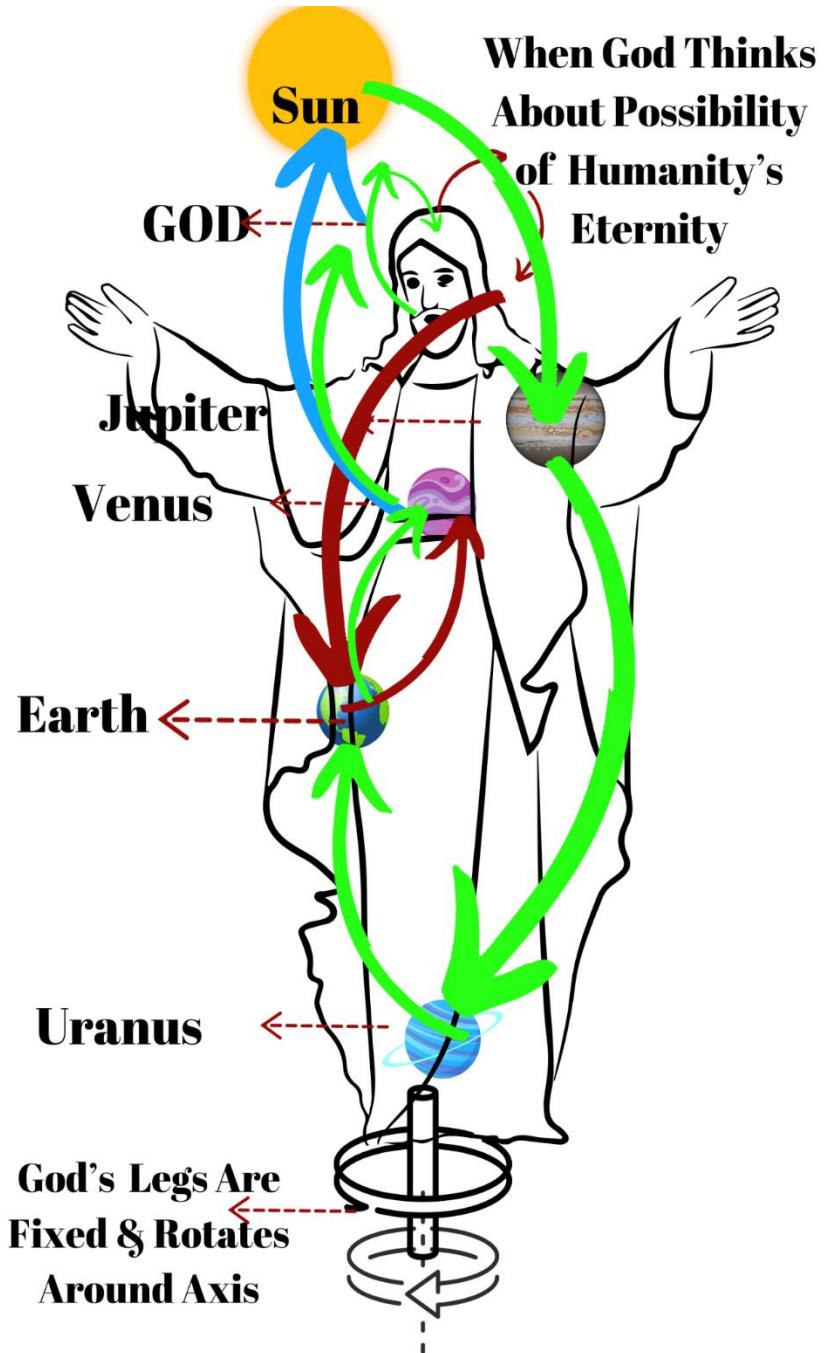

God's thought about his own eternity leaves the brain on his left side of the brain through the exit point in the head. The thoughts are sent to Jupiter. Then from Jupiter the thoughts are sent to

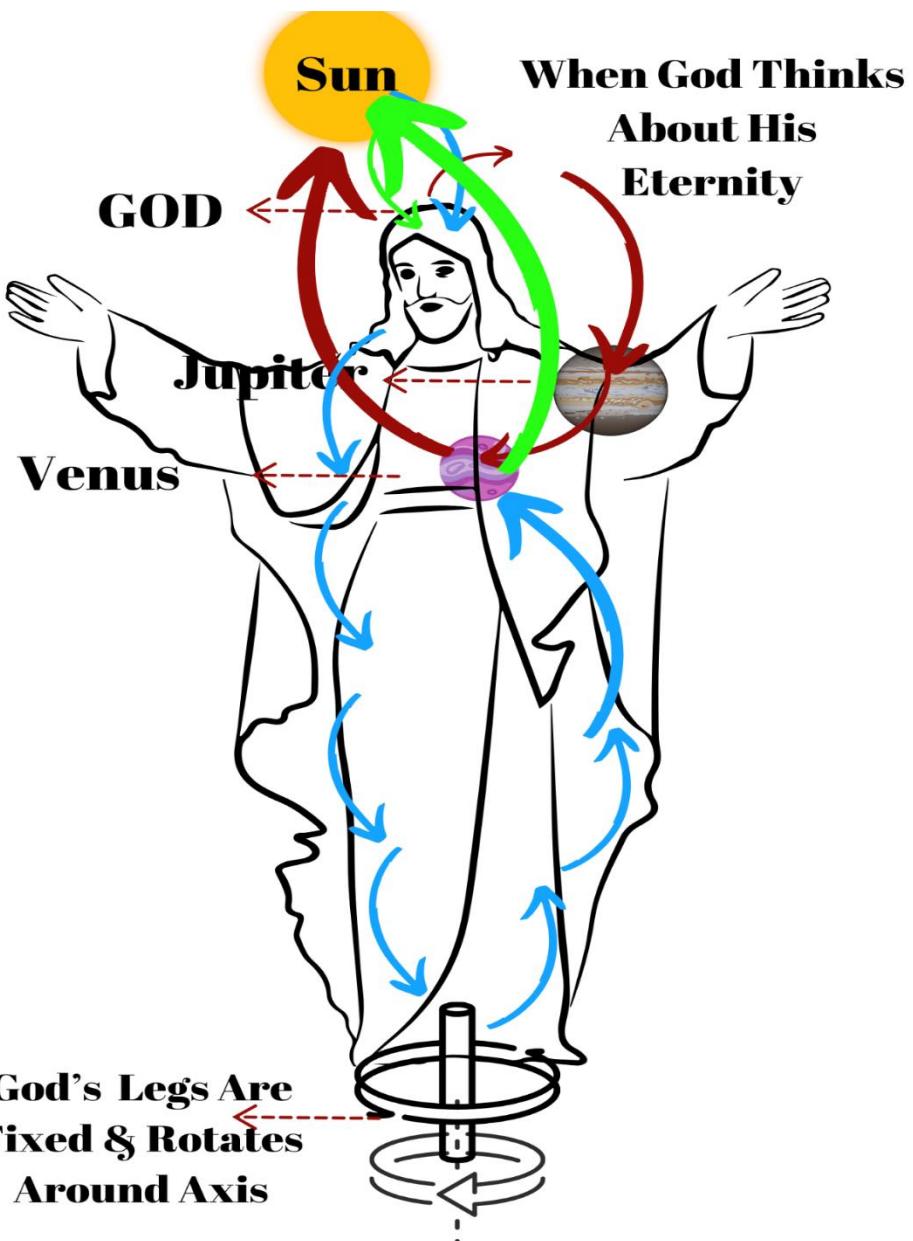

Venus. Then from Venus to the Sun. Then from the Sun back to God through the entry point on the right side of the head. Then from here into the full body of God right round to the feet and back again. Then back on the left side of the body to Venus. Now from Venus back to the Sun. Then from the Sun back to Yahweh that is God on the entry point on the right side of the head.

## CHAPTER FOUR

### Possibility of Humanity's Eternity.

Humans can achieve eternity if they establish life along the branches of the tree of life. It is possible but humanity must solve God's Dilemma. To be as clever as him and establish and create life on other planets. We can tell that Venus represents the heart of God.

his life as his life is given by earth. Venus represents eternity for God and humankind. Surprisingly, surprisingly is part of the tree of life. This is because Mars reminds God of what earth was before

his creation acts. But it also represents the death of earth. But again, humanity can create life on Mars just as God created life on Mars-like earth. Mercury is an old memory of God. It represents the beginning of time to God. Neptune represents places where higher angels live or are associated with. Jupiter is the communication channel when God is thinking.

I explained in the Thoughts to Word or Audio brain decoding book series that when humankind thinks. The thought is emitted outside of the head and human body into the air. This is through the exit point on the right side of the head as viewed from the back or front. These thoughts are absorbed on the entry point on the left side of the head. Then after absorption they are processed.

But we also know from Genesis that humanity was created by the image of God. So, it follows that the same applies to God. But might occur differently as man is God's image as looking in the mirror then it follows too that it occurs on the opposite sides. If the exit point in man is on the right side of the head. Exit point of the brain thoughts in God might be on the left side. But it can also be that it is the same as man being behind God and all facing the same direction.

The moon is God's memory bank, and God's anger as this is used to record and store mankind's prayers. Since humanity has never been obedient to God it follows that God's wrath is stored here too. Lack of prayers to God means him getting angry as the moon is always half empty when it is supposed to be filled with people's prayers.

The Sun is God's source of rejuvenating, power, and source of energy.

I will look at God's hand before looking at the tree of life in detail.  
God's hand.

Little Finger.

This is the smallest finger and to God this is associated with death.

The Ring Finger.

This is where rings are normally worn by humans and not by God.

To God this represents hibernating as in resting.

The Middle Finger.

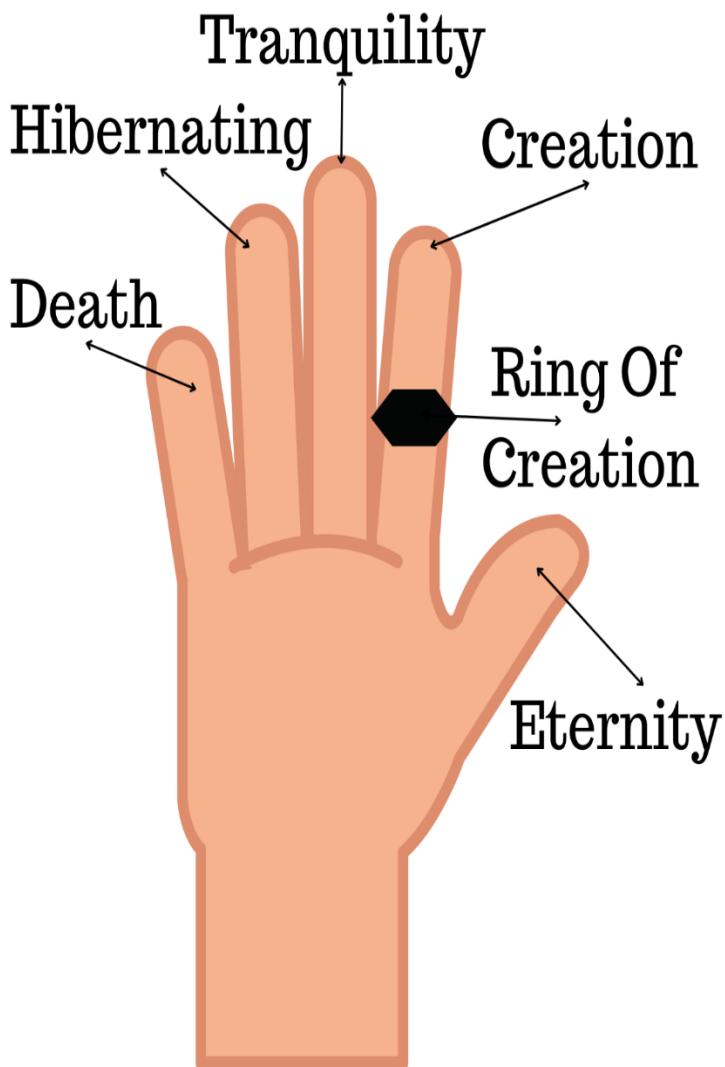

The middle finger represents tranquility to God.

The Index Finger.

This represents creation and rejuvenation to God. This is the finger God wears the ring of creation. One which he kissed before saying let there be....

The Thumb.

This is associated with eternity to God.

## How God thinks. God's thinking process.

I explained in detail how humans think in the Thoughts to Word or Audio book series. Especially in the Encyclopedia of Decoding the Brain.: How to Decode the Brain. The Definite Guide.

[https://play.google.com/store/books/details/David\\_Gomadza\\_Encyclopedia\\_of\\_Decoding\\_the\\_Brain?id=KcTPEAAAQBAJ&hl=en](https://play.google.com/store/books/details/David_Gomadza_Encyclopedia_of_Decoding_the_Brain?id=KcTPEAAAQBAJ&hl=en)

So, you might want to read this book first.

Again, to reiterate humankind is an image of God.

Humankind when he thinks; the brain identifies the place on the brain where it stores the words or thoughts. The brain stores words in four areas of the brain. The right front side of the brain. Two; the right back side of the brain. Three; the front left side of the brain. Lastly, the left back side of the brain. Therefore, when a person thinks for example about his son. The brain will point to the place on the head where the word son and everything to do with the son is stored on the brain. Then the thought is emitted out of the head through the exit point on the right side of the head. The thoughts travel in the air from the right hemisphere of the head to the left side of the brain. At the entry point, the thoughts are absorbed and then processed.

## God uses planets as part of his brain and thinking process.

As a rule, most of God's thoughts are emitted from the head through the left side of the head. These thoughts are sent to Jupiter. This is God's thinking 'organ' as well as a communication channel. I will look at the properties of these planets that support my arguments. This is true for thoughts regarding earthly beings, etc. But when the thoughts are to do with high rank angels that do not die like the Cherubims and the seraphim then God's thoughts are sent to Neptune.

Let us look at examples of God's thinking in progress.

## God's thoughts about man.

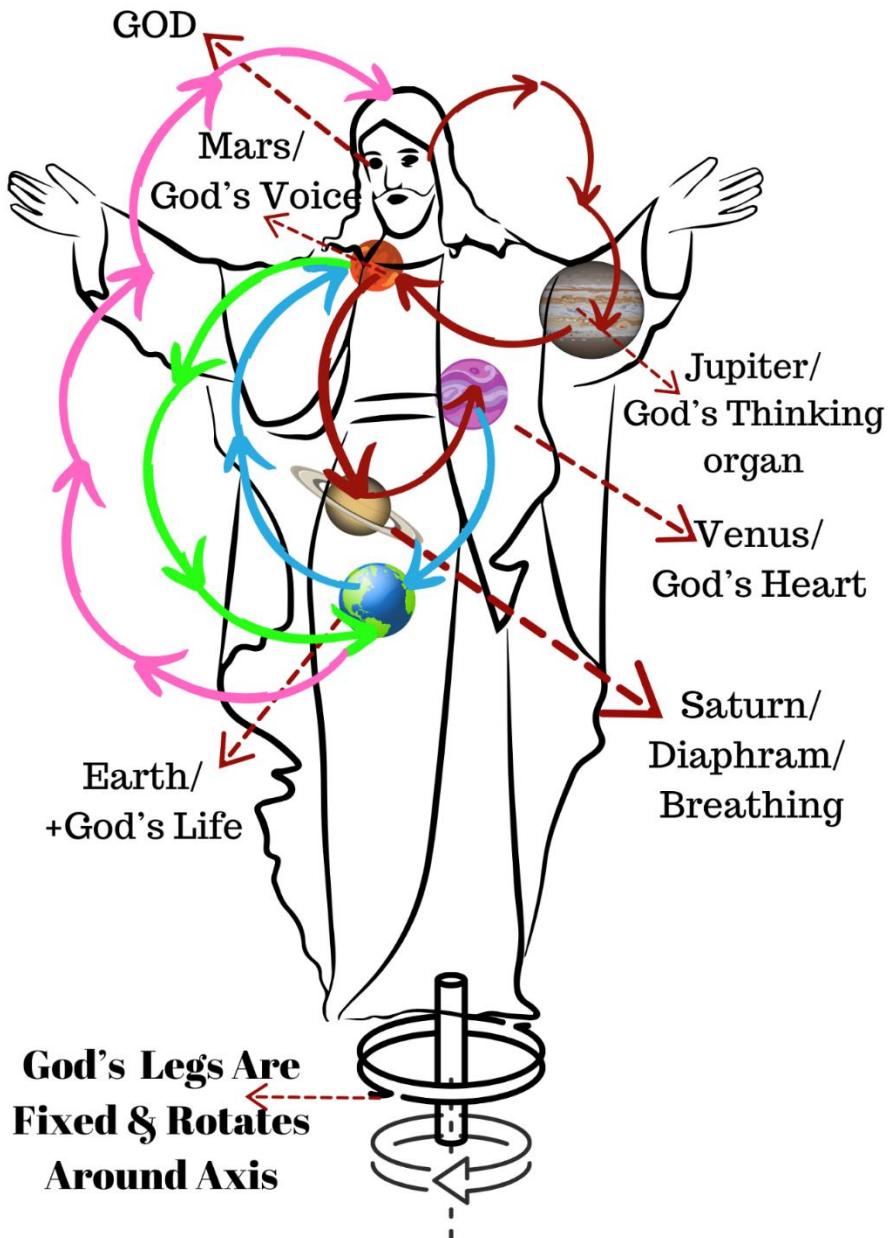

The thoughts are emitted from God's head and sent to Jupiter. Then from Jupiter the thoughts are sent to Mars. Then to Earth.

Then to Venus, Neptune and then back to God through the entry point on the left side of the brain.

### **God's thoughts about a woman.**

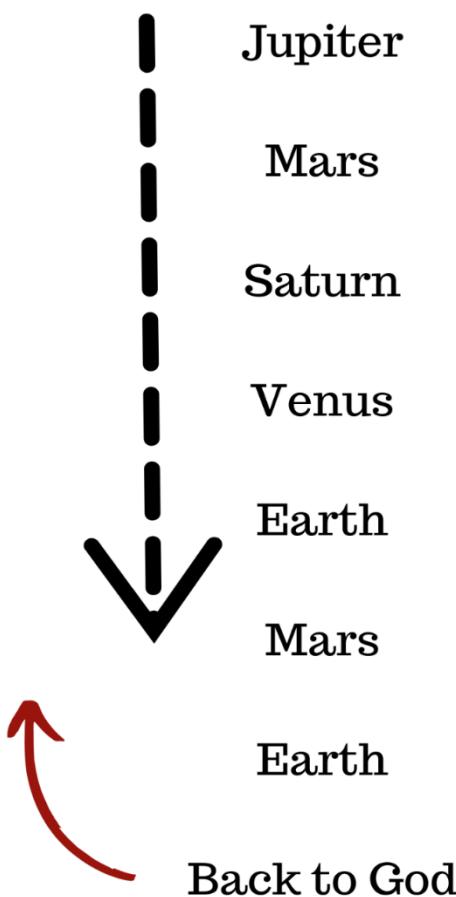

God's thoughts are emitted from the head into the universe and are absorbed by Jupiter. Then they are sent to Mars. Then to Saturn. Recall Saturn is situated on the right-side ribs of both God and Man. We know too that Saturn the devil deceived the woman. The thought is then sent to Venus. Then from Venus to Earth. A woman brought wrath of God and nearly caused the total fall of humankind. So, from Earth the thoughts are sent to Mars. This is the result of a woman betraying humanity by listening to the snake. Now from Mars the thoughts are sent back to Earth. Then to God.

# God Thinking About A Woman

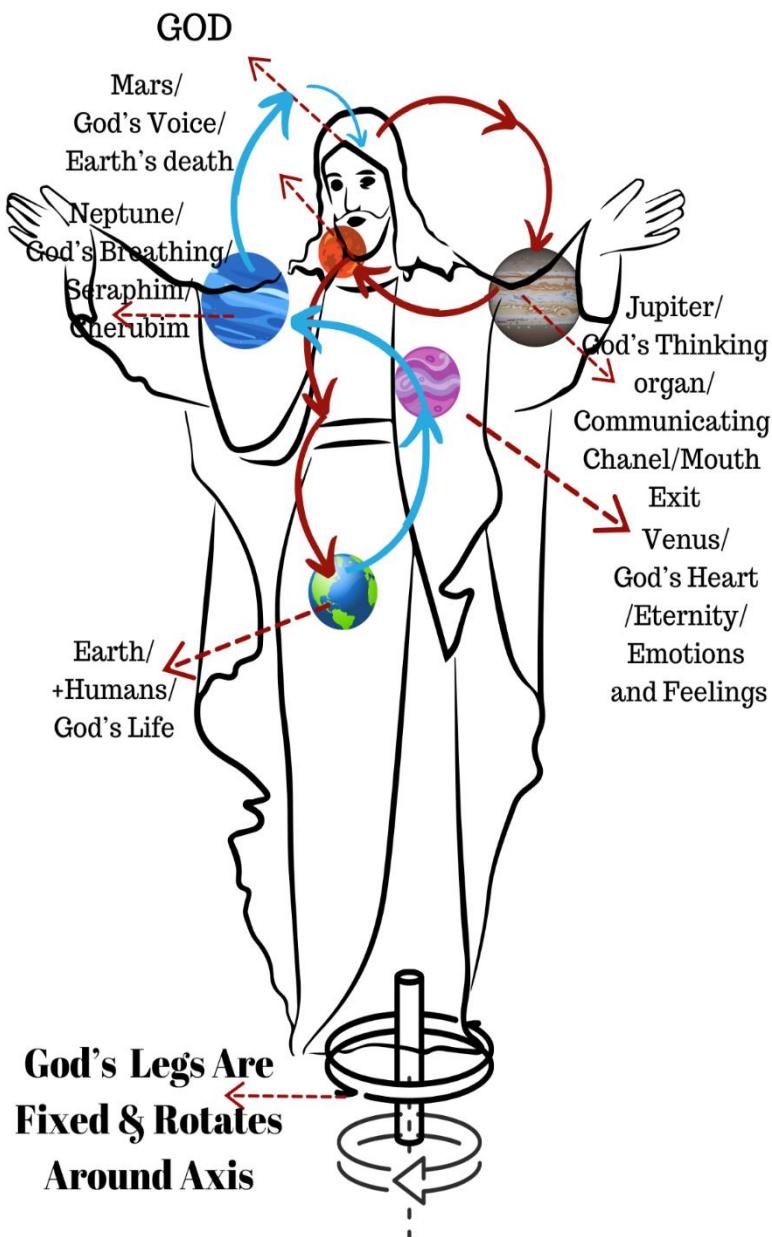

God Thinking About A Woman

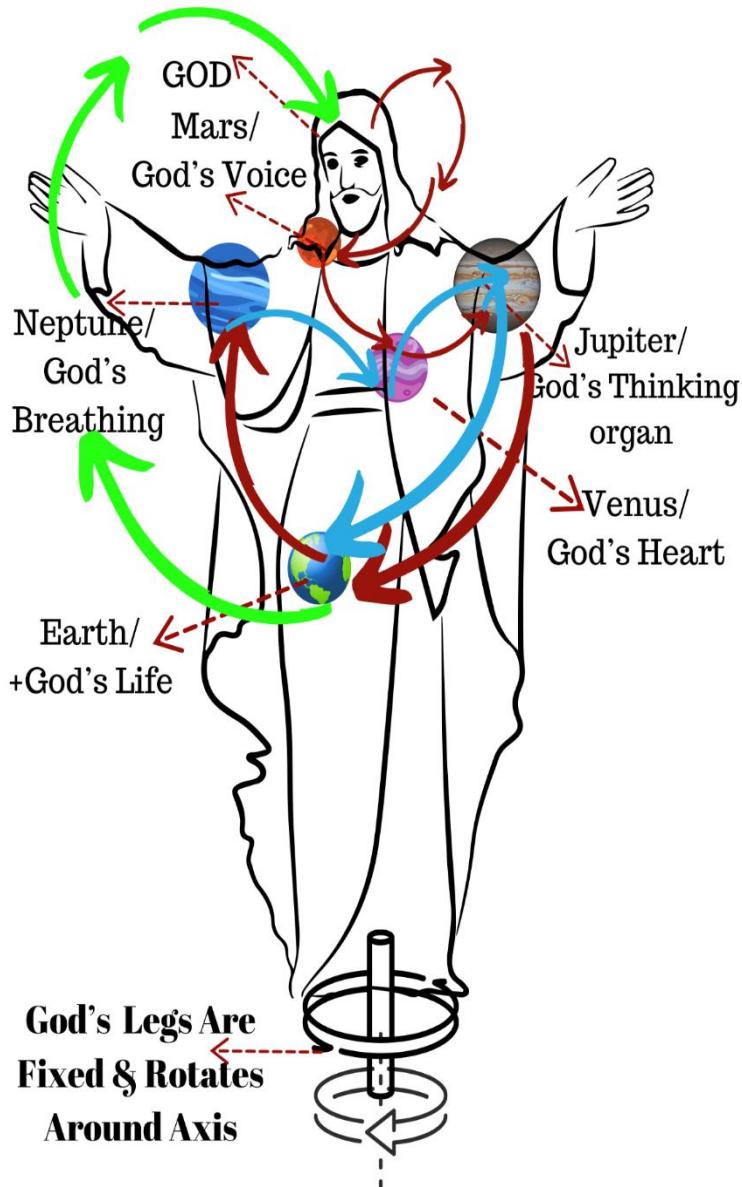

God's brain thoughts emitted  
Out to

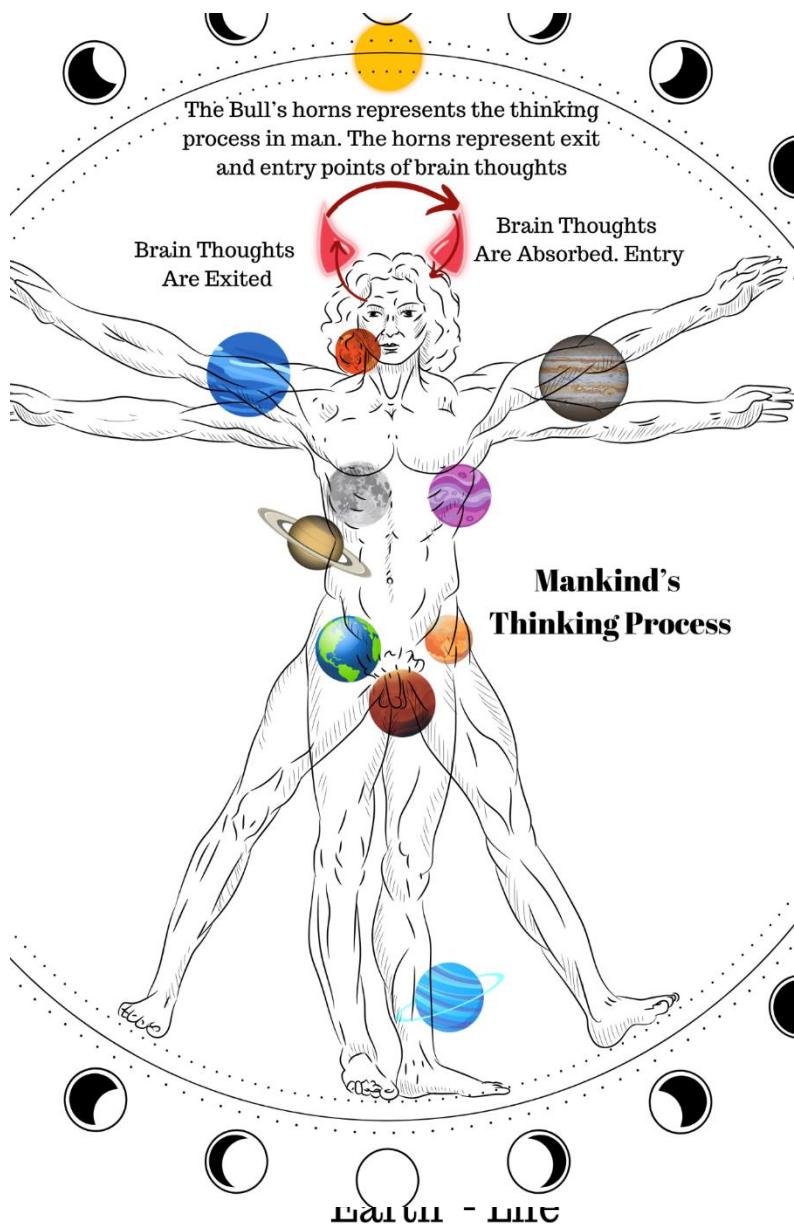

## God Thinking About Man

## God Thinking bout Creation

can see why the stories of Adam and Eve and their betraying God have an impact on how God thinks.

Let us look at how God thinks about creation.

### **God's thoughts about creation.**

God's thoughts are emitted from his brain and straight are sent to Mars. This is as near to what God found earth like. I described above how Venus is central to creation. So, from Mars God thought about creation. Is sent to Venus next. Then to the thinking process organ that is Jupiter. Then from Jupiter to Earth. Now from Earth to Neptune. Then from Neptune to Venus. Then from Venus to Jupiter. Then to Earth. Now Earth has life. Then back to God.

Now let us look at God's thoughts about the souls of dead people in action.

### **God's thoughts about the souls of the dead.**

God's thoughts are emitted from the head and are sent to Jupiter. Then to Mars. Then to Earth. Then to Saturn, one who brought sin and death to people. Then to Venus. Then to Jupiter and back to God.

Now let us look at God's thoughts about heaven in action.

### **God's thoughts when thinking about heaven.**

God's thoughts are emitted from the brain and sent to Jupiter. Then to Neptune. Then to Venus. Then back to Jupiter then to God.

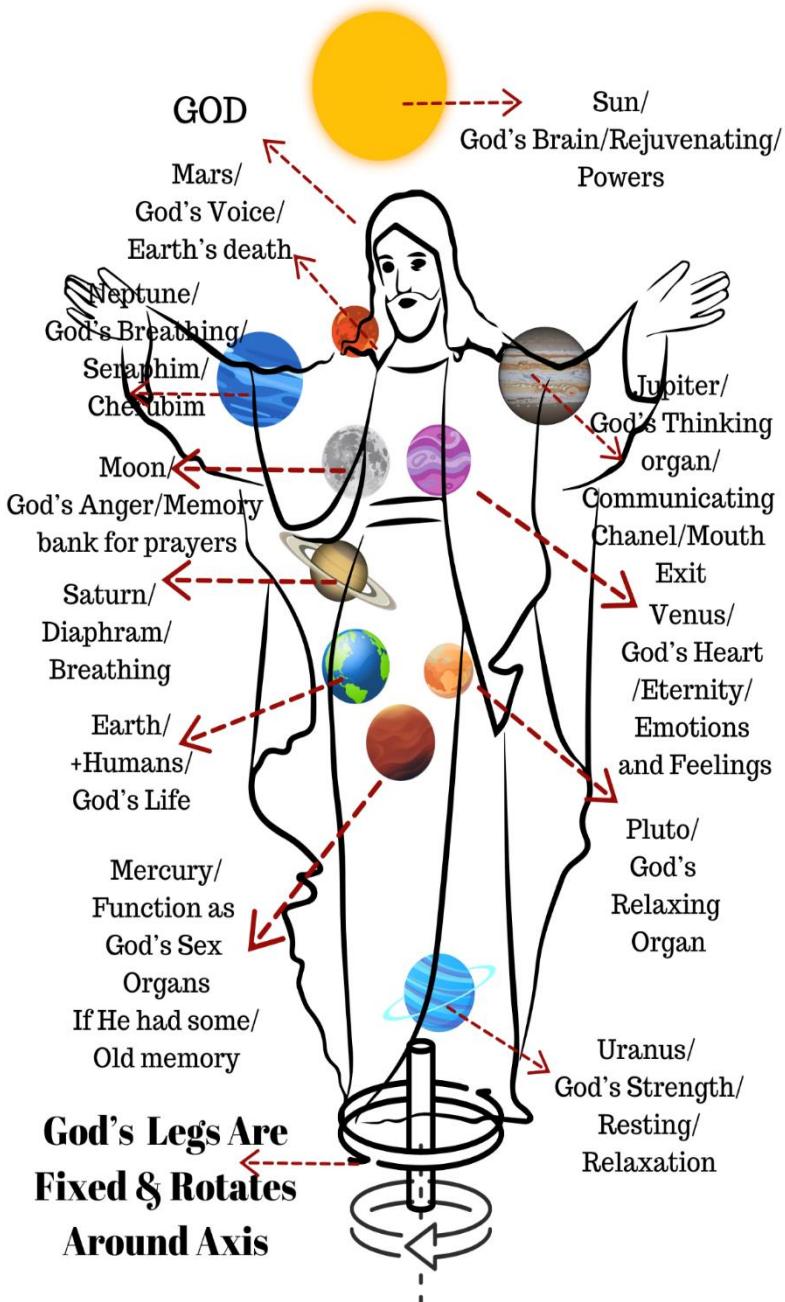

Now let us look at God's thoughts about hell.

Gods' thoughts are emitted from the brain to Jupiter. Then to Neptune. Then to Saturn. Then to Mars and back to God.

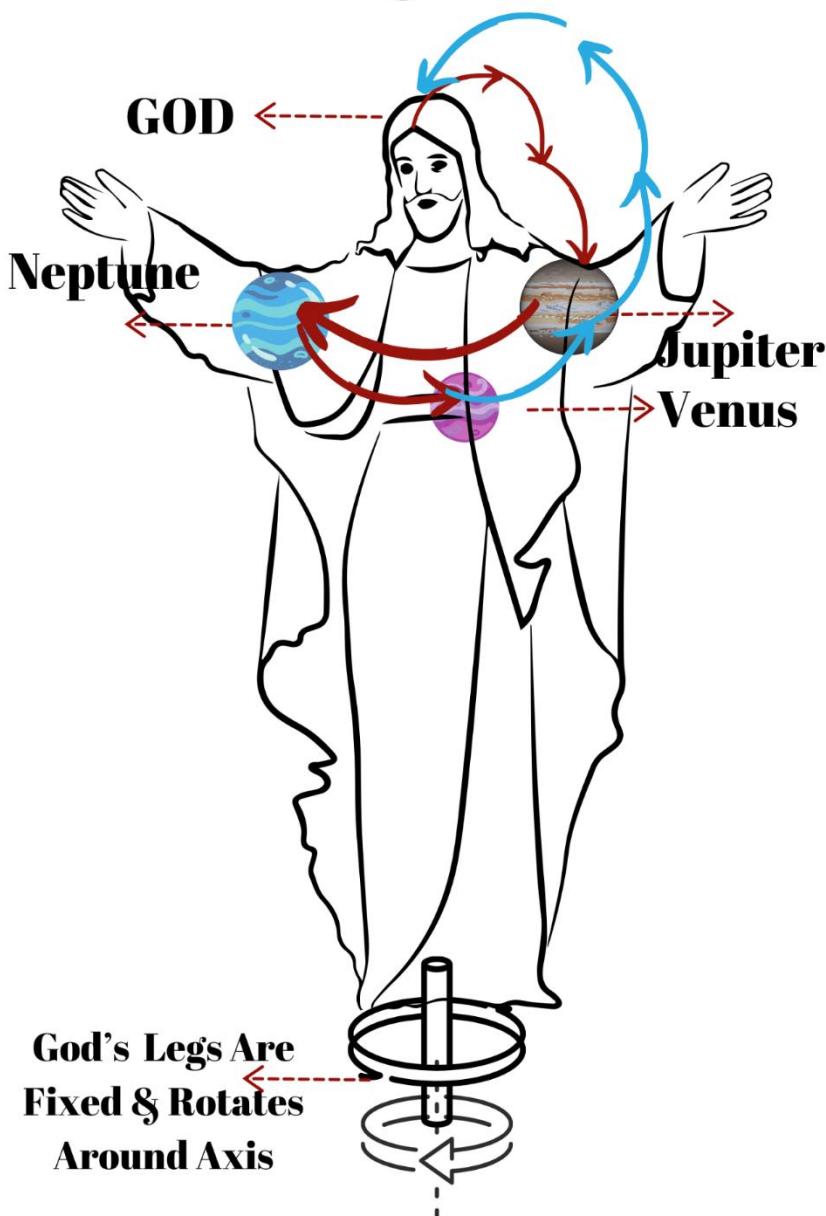

## CHAPTER FIVE

Life in the universe as a mirror image of something else in the universe.

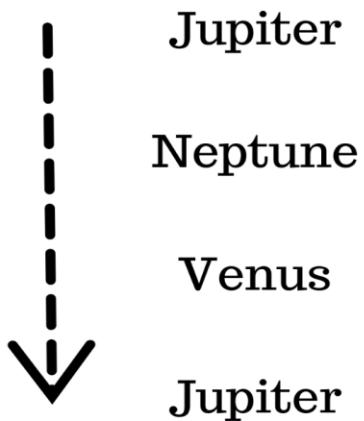

Everything in the universe as part of the formula for creation faces each other and is in a mirror image as if looking at each other.

Humanity's  
Death**

**When God  
Thinks About  
Seraphim**

## The Tree of Life.

A tree of life is a connected link between all planets that are capable of sustaining life and is developed by humanity. This is what guarantees mankind's survival forever. This is because the spread of all humankind to all connected links means reducing the risks of extinction in case a meteorite falls on earth.

## CHAPTER SIX

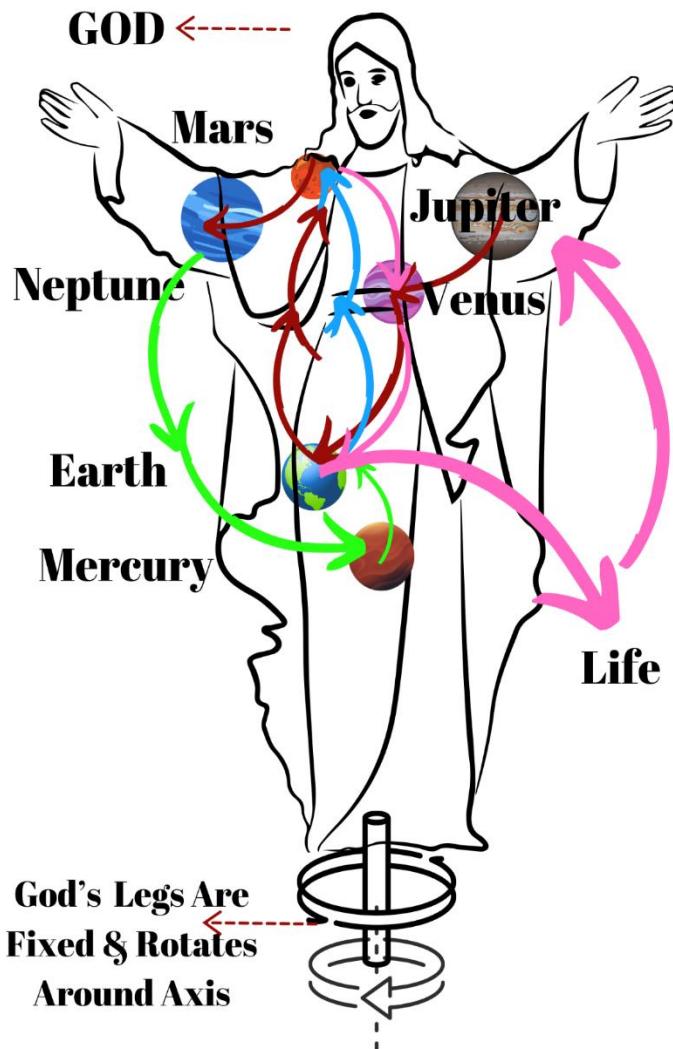

The Tree of Life from God's point of view.

In God's eyes the tree of life starts from Jupiter. Then to Venus. Then to Earth. Then Mars. Neptune. Mercury. Earth. Then To Mars. Then to Venus. Then To Earth which has life. Then back again to Jupiter. Then to God.

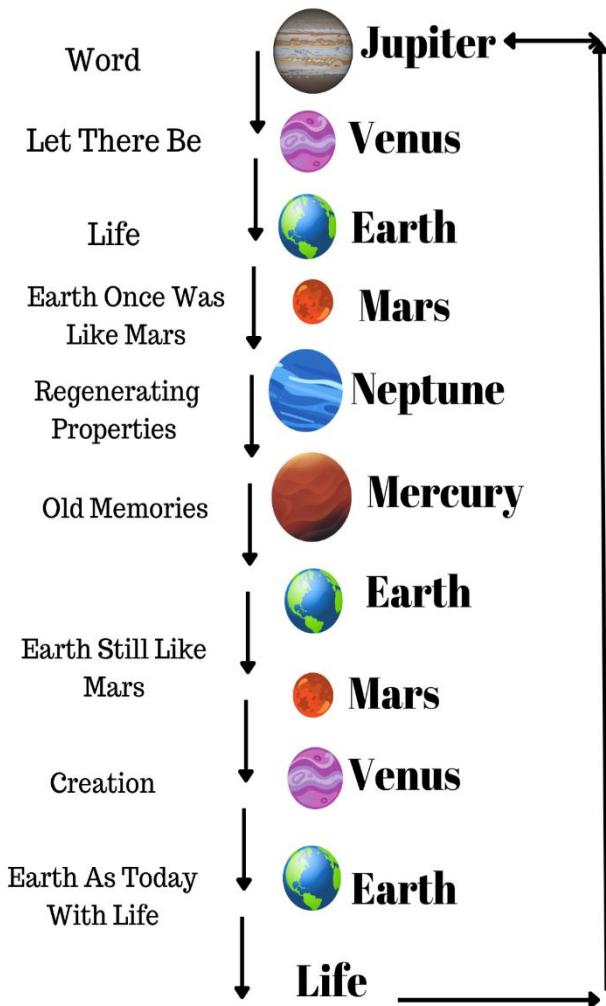

### Tree of Life

1. Jupiter. There was the word thought by God.
2. Venus. God's thoughts were turned into an action. Let there be...
3. Earth. At that time, it was like Mars.
4. Mars. Earth matched Mars without life.
5. Neptune. Ideas about regeneration and high rank angels.
6. Mercury. An Old memory.
7. Earth. Still as dead as Mars.
8. Mars. How can God turn Mars-like-Earth into a life-filled Earth?
9. Venus. Need for divine intervention. Creation which is associated with Venus.
10. Earth after God's creation.
11. Life on Earth.
12. Then back to God.

## **Tree of Life**

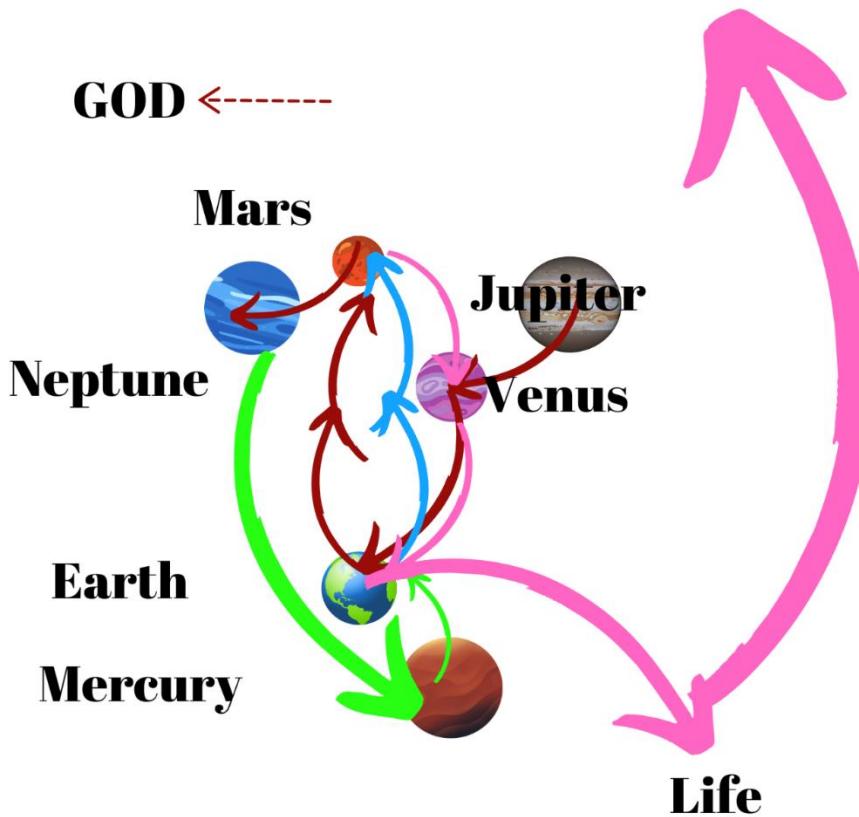

# Tree of Life

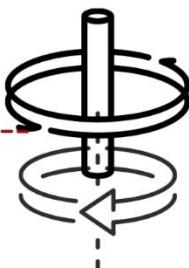

## Tree of Life

God's Legs Are  
Fixed & Rotates  
Around Axis

**God's Thinking Process in Detail and Man's Thinking Process in Detail.**

The planets all are important in the thinking purpose of God. They act as organs of God's body that helps with the processing of thoughts.

Thoughts by God are excited from God's body to the planets concerned. But go through Jupiter which represents God's thinking organ. Any thoughts about creation, life, great ideas etc. go through Venus.

Anything involving women will go at some point through Saturn. Women are from man's ribs exactly where Saturn is placed on God's body. After all this Saturn deceived the woman and nearly caused the complete fall of men. At some point therefore the thoughts must go through Mars. Mars represents the death of earth for disobeying God's commands. At some point the thoughts must go through Venus representing creation.

Uranus is a special planet and has a special role in God's thinking process.

**Uranus as a God's thought duplicating, twinning, cloning or doubling planet.**

At some point in the thinking process God's thoughts need to go through two different places at the same time. But the thought that leaves God's brain is just one. So how can God's thoughts be cloned and sent to two different planets at the same time for him to assess the results of his thoughts?

First, I will look at the role of Pluto to understand this process.

**Pluto.**

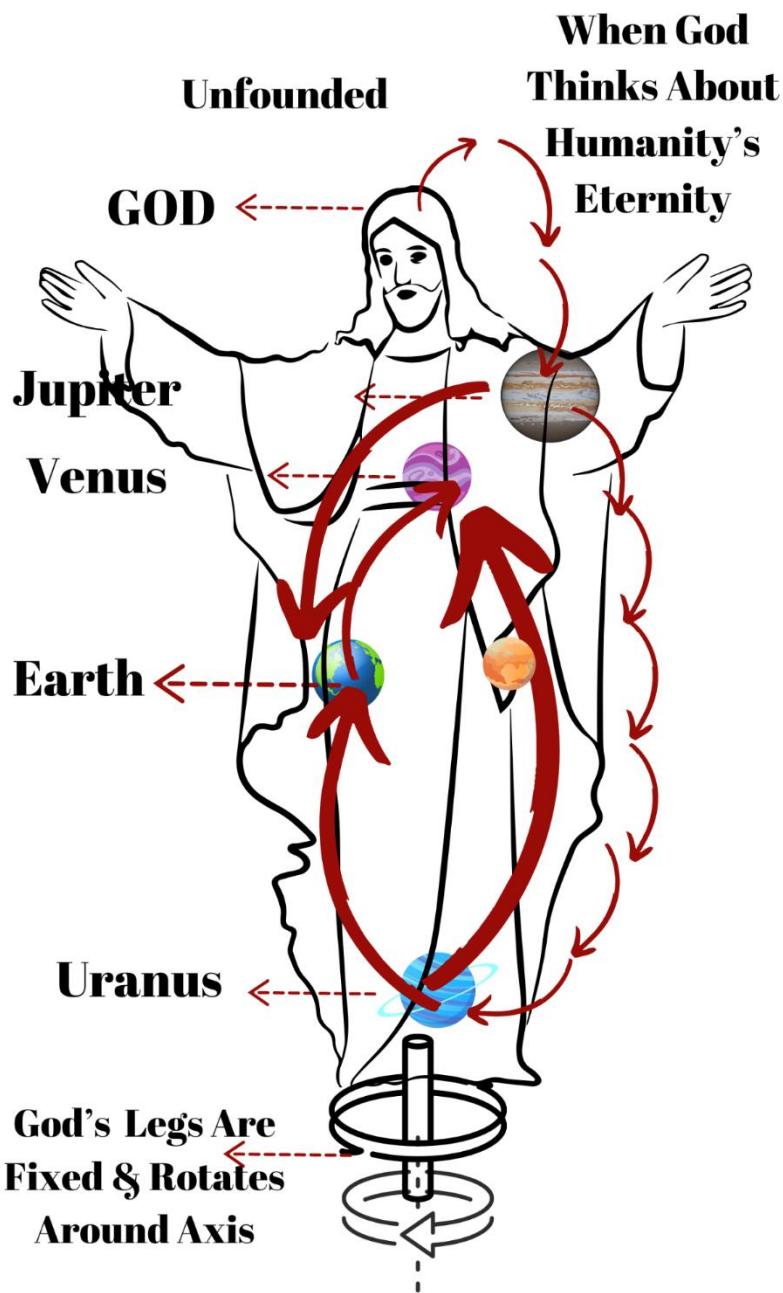

Consists of ice mountains and frozen. Its temperature surface is - 228 to -238 degrees Celsius which makes it too cold for life.

Pluto as a ‘diverging diode’ of God’s thoughts.

Pluto acts as a diverging agent that diverts God’s thoughts whenever duplicating of God’s thoughts is needed. On God’s body it is in the same line as earth but on the left side of the body. The ice-cold temperature is meant to divert God’s thoughts from Jupiter to Uranus which does the cloning of God’s thoughts.

So, Pluto acts like a charged diode that diverts the thoughts straight to Uranus if it were an electric circuit.

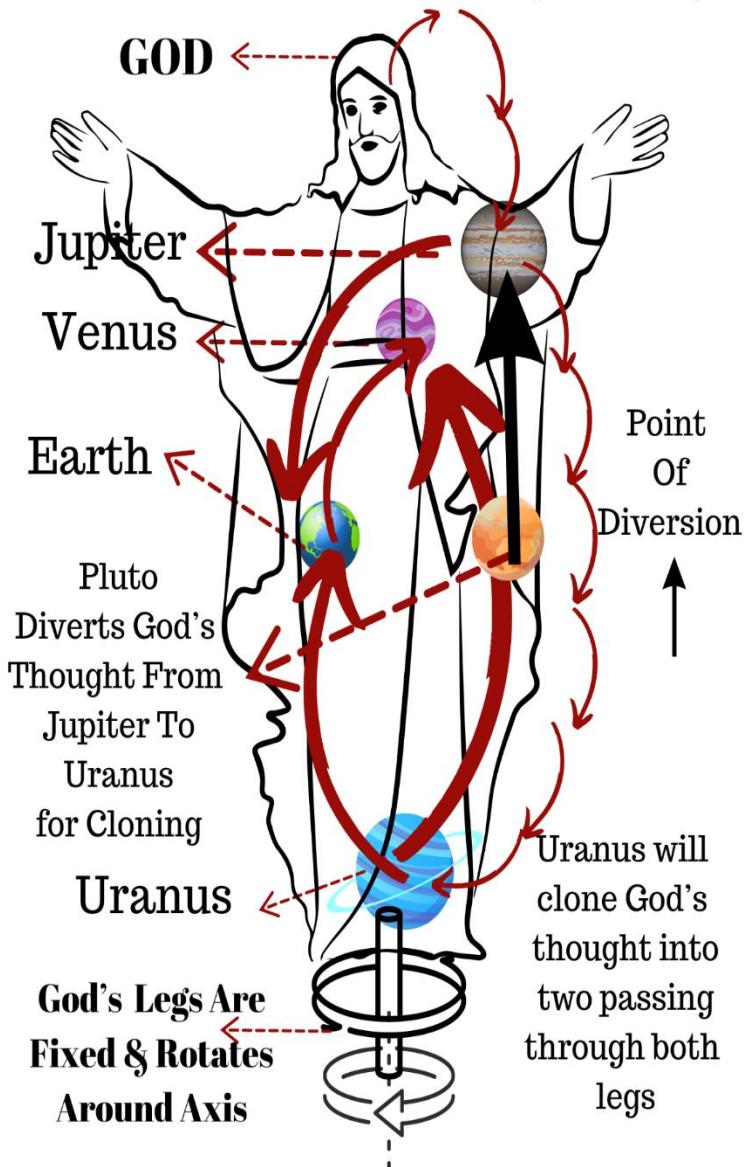

What happens in Uranus?

Cloning or Duplicating of God's thoughts.

## Pluto as A Diverter of God's Thought and Uranus for Duplicating God's Thoughts

When God Thinks About Humanity's Eternity

I explained that God has legs, but they are joined. The big toes are

stuck together as the heels. But there is space in between the legs. The effect of this is to make it possible to divert a single thought that is absorbed into Uranus which is on God's left calf muscle. That creates two out flows through both legs.

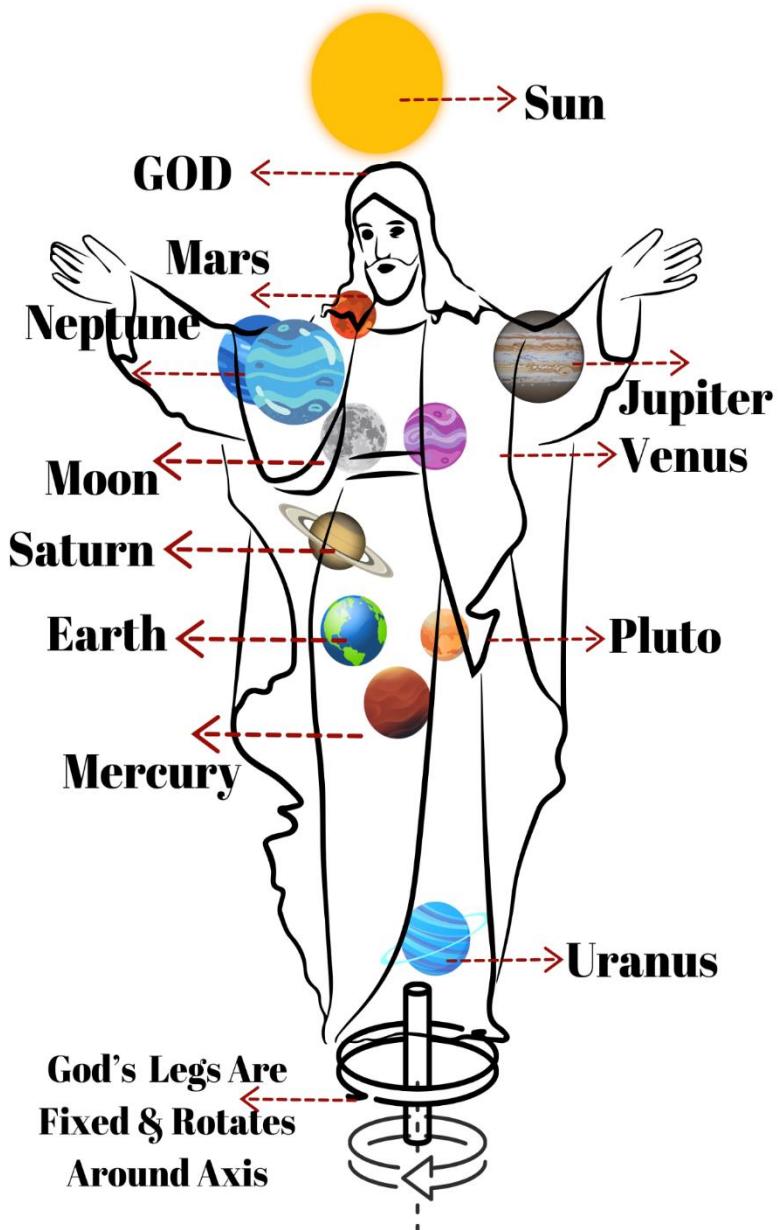

The effect is to double one thought received into Uranus into two thoughts that leaves through both legs.

## CHAPTER SEVEN

A perfect example is when God thinks about humanity's eternity. Automatically the thought is sent to verify if human eternity is possible and a reality. Therefore, God's thought about human eternity is emitted from the body. Then this is sent to Jupiter as you now know God's thinking organ. Pluto on the left side of God then diverts the thought to Uranus to be twinned or doubled so that one is sent to Venus to check while the other is sent to earth. All at the same time.

This is only possible through the works of Pluto that diverts to Uranus and for Uranus to channel back this thought through both legs one to earth and the other to Venus.

# CHAPTER EIGHT

## Deoxyribonucleic Acid [DNA]

Background Information from Wikipedia.

Deoxyribonucleic acid (*/di-'ɒksi rai'bənju: kli:ɪk, - kleɪ-/*; <sup>i [1]</sup> DNA) is a polymer composed of two polynucleotide chains that coil around each other to form a double helix. The polymer carries genetic instructions for the development, functioning, growth and reproduction of all known organisms and many viruses. DNA and ribonucleic acid (RNA) are nucleic acids. Alongside proteins, lipids and complex carbohydrates (polysaccharides), nucleic acids are one of the four major types of macromolecules that are essential for all known forms of life.

The two DNA strands are known as polynucleotides as they are composed of simpler monomeric units called nucleotides. <sup>[2][3]</sup> Each nucleotide is composed of one of four nitrogen-containing nucleobases (cytosine [C], guanine [G], adenine [A] or thymine [T]), a sugar called deoxyribose, and a phosphate group. The nucleotides are joined to one another in a chain by covalent bonds (known as the phosphodiester linkage) between the sugar of one nucleotide and the phosphate of the next, resulting in an alternating sugar-phosphate backbone. The nitrogenous bases of the two separate polynucleotide strands are bound together, according to base pairing rules (A with T and C with G), with hydrogen bonds to make double-stranded DNA. The complementary nitrogenous bases are divided into two groups, pyrimidines and purines. In DNA, the pyrimidines are thymine and

cytosine; the purines are adenine and guanine.

Both strands of double-stranded DNA store the same [biological information](#).

Attached to each sugar is one of four types of nucleobases (or *bases*). It is the [sequence](#) of these four nucleobases along the backbone that encodes genetic information. [RNA](#) strands are created using DNA strands as a template in a process called [transcription](#), where DNA bases are exchanged for their corresponding bases except in the case of thymine (T), for which RNA substitutes [uracil](#) (U). [4] Under the [genetic code](#), these RNA strands specify the sequence of [amino acids](#) within proteins in a process called [translation](#).

The DNA double helix is stabilized primarily by two forces: [hydrogen bonds](#) between nucleotides and [base-stacking](#) interactions among [aromatic](#) nucleobases. [15] The four bases found in DNA are [adenine](#) (A), [cytosine](#) (C), [guanine](#) (G) and [thymine](#) (T). These four bases are attached to the sugar-phosphate to form the complete nucleotide, as shown for [adenosine monophosphate](#). Adenine pairs with thymine and guanine pairs with cytosine, forming A-T and G-C [base pairs](#). [1]

A chromosome is a long [DNA](#) molecule with part or all of the [genetic material](#) of an organism. In most chromosomes the very long thin DNA fibers are coated with packaging proteins; in [eukaryotic](#) cells the most important of these proteins are the [histones](#). These proteins, aided by [chaperone proteins](#), bind to and [condense](#) the DNA molecule to maintain its integrity. [1][2] These chromosomes display a complex three-dimensional structure, which plays a significant role in [transcriptional regulation](#).

Chromosomes in humans can be divided into two types: [autosomes](#) (body chromosome(s)) and allosome ([sex chromosome](#)(s)). Certain genetic traits are linked to a person's sex and are passed on through the sex chromosomes. The autosomes contain the rest of the genetic hereditary information. All act in the same way during cell division. Human cells have twenty-three pairs of chromosomes (22 pairs of autosomes and one pair of sex chromosomes), giving

a total of forty-six per cell.

A karyotype is the general appearance of the complete set of [chromosomes](#) in the cells of a [species](#) or in an individual organism, mainly including their sizes, numbers, and shapes. [\[1\]](#)[\[2\]](#) Karyotyping is the process by which a karyotype is discerned by determining the chromosome complement of an individual, including the number of chromosomes and any abnormalities.

## CHAPTER NINE

Ezekiel's Vision of God as our basis for explaining human DNA and God.

Ezekiel 1

1 Now it came to pass in the thirtieth year, in the fourth *month*, on the fifth *day* of the month, as I *was* among the captives by the River Chebar, *that* the heavens were opened and I saw visions<sup>[a]</sup> of God.<sup>2</sup> On the fifth *day* of the month, which *was* in the fifth year of King Jehoiachin's captivity,<sup>3</sup> the word of the LORD came expressly to Ezekiel the priest, the son of Buzi, in the land of the<sup>[b]</sup> Chaldeans by the River Chebar; and the hand of the LORD was upon him there.

<sup>4</sup> Then I looked, and behold, a whirlwind was coming out of the north, a great cloud with raging fire engulfing itself; and brightness *was* all around it and radiating out of its midst like the color of amber, out of the midst of the fire.

<sup>5</sup> Also from within it *came* the likeness of four living creatures.

And this *was* their appearance: they had the likeness of a man.<sup>6</sup> Each one had four faces, and each one had four wings.<sup>7</sup> Their<sup>[c]</sup> legs *were* straight, and the soles of their feet *were* like the soles of calves' feet. They sparkled like the color of burnished bronze.<sup>8</sup> The hands of a man *were* under their wings on their four sides; and each of the four had faces and wings.<sup>9</sup> Their wings touched one

another. *The creatures* did not turn when they went, but each one went straight forward.

<sup>10</sup> As for the likeness of their faces, *each* had the face of a man; each of the four had the face of a lion on the right side, each of the four had the face of an ox on the left side, and each of the four had the face of an eagle. <sup>11</sup> Thus *were* their faces. Their wings stretched upward; two *wings* of each one touched one another, and two covered their bodies. <sup>12</sup> And each one went straight forward; they went wherever the spirit wanted to go, and they did not turn when they went.

<sup>13</sup> As for the likeness of the living creatures, their appearance *was* like burning coals of fire, like the appearance of torches going back and forth among the living creatures. The fire was bright, and out of the fire went lightning. <sup>14</sup> And the living creatures ran back and forth, in appearance like a flash of lightning.

<sup>15</sup> Now as I looked at the living creatures, behold, a wheel *was* on the earth beside each living creature with its four faces. <sup>16</sup> The appearance of the wheels and their workings *was* like the color of beryl, and all four had the same likeness. The appearance of their workings *was*, as it were, a wheel in the middle of a wheel. <sup>17</sup> When they moved, they went toward any one of four directions; they did not turn aside when they went.

As on Earth as In Humans as It Is in Humans.

[https://play.google.com/store/books/details/\*David Gomadza As On Earth As In Heaven As It Is In?\*id=I1rPEAAAQBAJ](https://play.google.com/store/books/details/David_Gomadza_As_On_Earth_As_In_Heaven_As_It_Is_In?id=I1rPEAAAQBAJ)

I wrote the above book regarding the Egyptian Pyramid of Giza, but I have applied the same concept throughout all the un decoded outstanding issues like decoding the brain, DNA, Creation etc. God created man with his image. What happens in heaven or has happened in the past has an equal part on earth and or in humans.

That means visions of God in the bible explain also what happens to humans in real life.

I have already illustrated how the universe and the planets namely, Jupiter, the Sun, Mercury, Neptune, Venus, Pluto, Earth, Uranus, and Saturn are all parts of God's body. Above all these planets have corresponding equivalents to humans. Their functions are similar.

The exact layout of the universe and God as depicted in this book is the same way human brains and thinking work. Read all books in this series:

Thoughts To Word or Audio.

[https://play.google.com/store/books/details/David\\_Gomadza\\_Thoughts\\_To\\_Word\\_Or\\_Audio?id=q2xmEAAAQBAJ](https://play.google.com/store/books/details/David_Gomadza_Thoughts_To_Word_Or_Audio?id=q2xmEAAAQBAJ)

Now I am going to use the above vision of Ezekiel to explain what DNA is and how the body categorizes and groups and arranges DNA.

First some basic facts and inferences.

A human being has 23 Chromosomes making a total of 46 Chromosomes. Half have come from the mother and the other half from the father.

God has twenty-eight paired chromosomes making a total of fifty-six chromosomes. But you must also know that God has a single chromosome that is not paired. This makes God's chromosomes twenty-nine. This single chromosome is responsible for wing development. That is twenty-eight pairs and a single chromosome. Making a total of fifty-seven chromosomes.

But you must also know that God is referred to as the trinity as in God the Father, God the Son, and the Holy Spirit. Therefore, sometimes you get the correct chromosome of God being thirty-three double chromosomes making a total number 66 chromosomes.

God has no sexual organs, but he has both the X and the Y chromosome.

The body group DNA sequence based on four bases namely; adenine (A), cytosine (C), guanine (G) and thymine (T).

Rules of DNA Sequencing I have developed that will enable us to decode DNA.

As a rule, every protein needed for a certain function of the body is composed of 12 DNA sequence letters that is a mixer of A, C, G and T. So, every protein needed for example for hair growth, penis growth, for female breast growth, for blue eyes, for beautiful skin, for body rejuvenation, for body weight and body height etc. all are a combination of the four bases all up to twelve letters per function. The body can link all DNA sequences of all functions as one long string of a combination of the four bases. But it separates each function by the shear rule that every twelve letters make a word. So, every twelve letters denote a separate function.

### A start.

Just like the written language and the language of the brain. DNA starts with a start. This is like a sentence opener where it is used to identify the beginning of a DNA strand.

### A stop.

Just like the written language and the brain language. The DNA language has a Stop. That determines the end of a sequence or the need to initiate a new chain or strand of DNA. A good example as you will notice is the DNA sequence of the word life. This is CCC = 8 = Proline

TAG = 5 = STOP

TAG = 5 = STOP

GTA 17 = Valine

Life = Proline + STOP + STOP + Valine

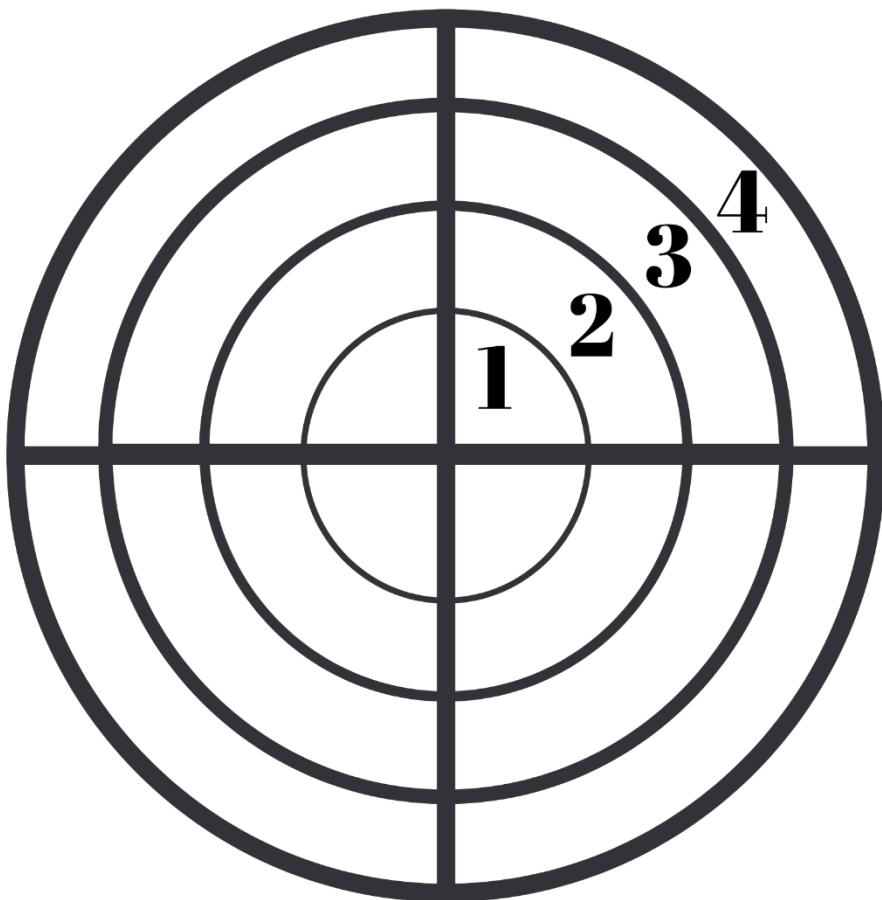

That is CCGTAGTAGGTA

### How to reference Chromosomes.

The largest chromosome is Chromosome 1, followed by two until the last chromosome twenty-two.

Even though X and Y are chromosomes they are usually left out as a rule.

The body identifies the protein responsible for certain functions by a twelve letter DNA sequence. That means every twelve letters of DNA means something. I have the following DNA sequence and their meaning or function that they are responsible for.

Four DNA codons are used to denote a word of a function or attribute. Four possible different protein combinations based on four bases are used to construct a twelve letter DNA sequence word that describes that function or attribute.

Any three bases denote a protein. Four proteins make up a word for an attribute or function in a human body.

Take hands for example. These are known by the body as  
CTCCTGATGATT.

Splitting this into four parts of three protein reference means:

CTC + CTG + ATG + ATT

To find the protein we use the charts below.

CTC = 2 = Leucine

CTG = 2 = Leucine

ATG = 13 = Methionine

ATT = 12 = Isoleucine

= Leucine + Leucine + Methionine + Isoleucine is the protein combination needed or identified by the body as responsible for hands.

Therefore, CTCCTGATGATT means a combination of Leucine + leucine + Methionine + Isoleucine= hands.

Now let us look at something that can be scientifically proved.

This is the name for Hair using DNA sequencing as understood by the body= CCATGCATGACT

CCA = 8 = proline

TGC = 6 = Cysteine

ATG = 13 = Methionine

ACT = 14 = Threonine

Proline + Cysteine + Methionine + Threonine is the protein combination that makes up the hair or responsible for hair growth.

The big question is, is this supported by scientific evidence? What

is normally attributed to hair growth? Is it a combination of the above proteins or something else?

Search criteria: Proline + Cysteine + Methionine + Threonine role in hair growth

## 2. Promotes Hair Growth

Certain amino acids, including cysteine, methionine, and lysine, support the synthesis of keratin, which is vital for hair growth. By ensuring a sufficient supply of these amino acids, you can encourage healthy and robust hair growth.

<https://www.hkvitals.com/blog/amino-acids-for-hair-how-do-they-work/#:~:text=2.-,Promotes%20Hair%20Growth,healthy%20and%20robust%20hair%20growth.>

Search criteria: Proline + Cysteine + Methionine + Threonine role in hair growth

[Threonine](#), or L-threonine, is an essential amino acid and a key ingredient in Divi's lineup of scalp products. Threonine is not one of the better-known amino acids, and it may not be the first thing springing to mind when you think about hair health, scalp health, or amino acids to prevent hair loss. Nevertheless, threonine is vital to human health and can-do wonders for the condition of your scalp and hair, especially when used regularly alongside other health-promoting ingredients.

<https://www.diviofficial.com/blogs/ingredients/threonine-for-hair-health>

**The Top 9 Amino Acids for Hair Growth and Where to Find Them**  
These are the top amino acids needed for hair growth, plus their food sources.

## 1. Cysteine

Cysteine belongs at the top of the list because it helps stimulate new hair growth and is an antioxidant that serves to protect against sun damage and other

degrading radiation. Cysteine can treat alopecia, a condition in which whole clumps of hair fall off of the body in patches. Plus cysteine brings sulfur to our hair cells, which is necessary for strength and a supple texture.

Food Sources:

- o Wheat germ
- o Chicken
- o Broccoli
- o Brussels sprouts
- o Dairy products (yogurt, milk)

## 2. Cystine

Cystine is *not* the same as cysteine, though there is a reason their names are so similar. Cystine is a nonessential amino acid, so-called because it is made up of two bonded cysteine molecules by our bodies' natural functioning. Cystine is also known to stimulate new hair growth and to prevent hair loss.

About 10-14% of our hair and skin is composed of cysteine, whose double-bonded cysteine molecules help provide structural strength to our hair shafts.  
Bonus: cystine is also important for immune system support.

Food Sources:

- o As cystine is constructed out of two cysteine molecules by our bodies, the food sources of cystine are the same as cysteine.

## 3. Proline

Proline is a nonessential amino acid that aids in collagen production, which plays a role both in the makeup of hair and in the preservation of muscle tissue.

Food Sources:

- o Eggs
- o Beans
- o Meat
- o Dairy products

- o Soybeans
- o Spinach
- o Broccoli
- o Asparagus
- o Legumes
- o Avocado

#### 4. Methionine

This essential amino acid also provides the sulfur needed to guard against hair disorders, as well as powerful antioxidant abilities. A lipotropic, methionine breaks down and prevents fat accumulation in the bloodstream, making it valuable for cardiovascular health and for providing optimal blood flow to our scalps and hair follicles, important for healthy hair growth. Methionine also is required for synthesizing collagen needed for hair shaft strength.

Food Sources:

- o Brazil nuts
- o Fish
- o Eggs
- o Sesame seeds
- o Cereal grains.

<https://aminoco.com/blogs/amino-acids/amino-acids-for-hair-growth>

What is the role of methionine in hair growth?

The main functions of L-methionine include the building of various protein molecules and the synthesis of the equally sulfurous amino acid L-cysteine. Methionine can therefore considerably strengthen the hair structure and nails.

<https://www.dmpharma.co.in/L-Cystine,%20L-Methionine,%20PABA,%20Biotin,%20Vitamins%20and%20Zinc%20Tablet.html#:~:text=The%20main%20functions%20of%20L,also%20help%20against%20hair%20loss.>

What Amino Acids Promote Hair Growth?

## Cysteine

This amino acid is the most important one out of the rest for hair growth. Cysteine is a potent antioxidant that shields hair from too much sun damage and other radiation that can deteriorate the health of hair. Cysteine can be found in foods such as chicken, milk, yogurt, and broccoli.

- Methionine

Being an antioxidant to prevent an imbalance of oxidation, methionine is an excellent amino acid to prevent hair loss, and studies have found that it could play a role in speeding down the rate at which gray hairs begin to appear.

So, overall, when these amino acids begin working together, they will begin to stimulate stronger, healthy, and softer hair. You can snap them up at many drugstores, supermarkets, and healthcare stores, but be sure to check the ingredients for those all-important amino acids.

<https://www.nutrivityality.com/health-blog/benefits-of-liquid-amino-acids-for-hair/>

Therefore, I can say for sure that the best combination for any hair product out there must include these four proteins in this correct order namely.

Proline + Cysteine + Methionine + Threonine

as this is what the body uses to make hair. All materials in this book and all my books are patented materials. You can use it if you donate in the future to Tomorrow's World Order.

Visit <https://twofuture.world/donate>

Now let us look at the things people search for the most on the internet.

Female breast growth first.

The body identifies several combinations of female breasts growth depending on other factors like time in life cycle whether at puberty or after puberty. I think those who want bigger boobs

search after puberty when they are not pleased by the results of puberty. The body identifies this Female breast growth as CTATCAGTTATA.

CTA = 2 = Leucine

TCA = 3 = Serine

GTT = 17 = Valine

ATA = 12= Isoleucine

Ladies, I found that secret of the century you can now have those big boobs courtesy of Tomorrow's World Order. Big balls for everyone.

This is the protein you need for sure to trigger the growth.

Leucine + Serine + Valine + Isoleucine

This is identified as the female breast growth protein combination.

Does science agree to this? Let us find out. But even if the information is not on the internet that explains why many women go under the knife to increase the size because no one apart from me has ever revealed the natural recipe until now. You will thank me later. But first let us find out the proof on the internet.

Is this protein combination; namely: Leucine + Serine + Valine + Isoleucine the secret to huge, lovely twins in breasts?

Search criteria:

Leucine Serine Valine Isoleucine improves breast growth.

Leucine supplementation and intensive training

Leucine, isoleucine and valine, the branched-chain amino acids (BCAA), make up about one-third of muscle protein. Of these, leucine has been the most

thoroughly investigated because its oxidation rate is higher than that of isoleucine or valine. Leucine also stimulates protein synthesis in muscle and is strongly associated with the release of gluconeogenic precursors, such as alanine, from muscle.

<https://pubmed.ncbi.nlm.nih.gov/10418071/>

There is not much direct reference on the internet to the above protein combination namely, Leucine + Serine + Valine and Isoleucine as being responsible for breast growth. However, there is a lot of information about this combination as responsible for muscle growth.

Ladies start taking foods associated with this protein combination.

### Male Penis Growth Supplements.

Now we look at men's greatest worry. The size of their thing and the need to keep growing it especially with age. Do not worry this protein combination will help and I guess reduce the shrinking associated with aging.

The body identifies two DNA sequencing associated with penis growth in men. These are the ones that happen during puberty and the other ones that happen after puberty when things did not go as expected or due to other external factors like a reduced self-ego. These are puberty penis g

## CHAPTER TEN

### Male Penis Growth Supplements.

Now we look at men's greatest worry. The size of their thing and the need to keep growing it especially with age. Do not worry this protein combination will help and I guess reduce the shrinking associated with aging.

The body identifies two DNA sequencing associated with penis growth in men. These are the ones that happen during puberty and the other ones that happen after puberty when things did not go as expected or due to other external factors like a reduced self-ego. These are puberty penis growth known as GGGTGATATTG and the other associated with malfunction or age which is CGGGTGATACGT.

This is made up of:

CGG = 11 = Arginine

GTG = 17 = Valine

ATA = 17 = Valine

CGT = 11= Arginine

Arginine + Valine + Valine + Arginine is the combination needed for penis growth after normal puberty.

**Is there proof of this on the internet?**

It is like the breast growth saga. No one knows the truth. But worry not anymore. I will reveal the truth.

Search criteria using google search: Does Arginine + Valine + Valine + Arginine increase penis growth and size?

Does L-Arginine Increase Penis Size?

L-Arginine is an amino acid found in most animal products, like lean meat, fish, and beef. This compound is also reproduced in the lab and is a popular supplement today in the male sexual health industry.

While L-Arginine has been found to affect erections positively, there is no scientific evidence to support the fact that this supplement increases penis size. In fact, no miracle pill will increase the size of your penis.

<https://www.penisenlargementresource.com/knowledge/l-arginine-and-penis-size>

The implication to me is good enough.

I think it is not just the presence of Arginine as part of the ingredient but the exact sequence and proportions that are important.

I solved the same issue in decoding the brain whether people can say commands that include the needed brain language to effect change but with the brain unable to respond to such commands just because this is not the specific language the understand the command. The brain is just like the body and DNA uses specific commands which it will act upon.

I explained that people can say rejuvenate with the body unable to respond to this command. Even though this word rejuvenate is the centerpiece of the command to initiate the body rejuvenate. The

brain expects the full combination of words to initiate that command and rejuvenate the body.

But saying:

Oh Yes Rejuvenate.

Is the command the brain listens to.

This is the language of the brain. Likewise, I believe this is the same here with this Arginine as a penis growth supplement. The body needs the right and correct combination.

Therefore, take supplements in the correct order.

Arginine + Valine + Valine + Arginine

This is the combination in order that will make the body start penis enlargement and not just taking Arginine and valine. But following the correct sequence.

It is like writing a sentence; *David reveals secrets out of this world* in any order. Surely you will lose the meaning of the word even though all the words are included in the sentence.

Ever wonder why the spoken language is like chromosomes and DNA to some extent? The body uses rules just like the language. The body speaks its own language just like the brain. So, follow the rules if you want the body to initiate any commands.

So, writing the above sentence as: Out of this world secrets reveals David.

Surely this might mean something.

Let us look at another most searched word, Life.

The body understands life as a DNA sequence  
CCCTAGTAGGTA.

This is made up of:

CCC = 8 = Proline

TAG = 5 = STOP

TAG = 5 = STOP

GTA 17 = Valine

Life = Proline + STOP + STOP + Valine

The questions to ask are these. What is the effect of Proline and Valine?

So, what is Proline and what does it do?

Proline extends life. Outright!

Proline metabolism regulates replicative lifespan in the yeast *Saccharomyces cerevisiae*. Intracellular proline regulates the yeast replicative lifespan.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6780008/>

STOP codons.

*There are 3 STOP codons in the genetic code – TAG [UAG], TAA [UAA], and TGA [UGA]. These codons signal the end of the polypeptide chain during translation. These codons are also known as nonsense codons or termination codons as they do not code for an amino acid.*

Why is Proline so special?

Proline is unique in that it is the only amino acid where the side chain is connected to the protein backbone twice, forming a five-membered nitrogen-containing ring.

<http://www.russelllab.org/aas/Pro.html#:~:text=Proline%20is%20unique%20in%20that,%2Dmembered%20nitrogen%2Dcontaining%20ring.>

What does Valine do?

People may use valine supplements for muscle growth, tissue repair, and energy.

Lastly let us look at one of the most researched words. Aging.

The body identifies aging as CCCTATACCGTA.

This is made up of CCC = 8 = Proline

TAT = 4 = Tyrosine

ACC = 14 = Threonine

GTA = 17 = Valine

Aging is Proline + Tyrosine + Threonine + Valine or a lack of these proteins.

A metabolomics study of aging mice found proline, alanine, serine, tyrosine, and methionine to decrease plasma with aging.

<https://www.sciencedirect.com/science/article/pii/S2468501119300082>

Which amino acids are anti-aging?

Proline is one of the best amino acids for targeting aging skin. This is because proline promotes collagen production, which is important for reducing the

appearance of fine lines and wrinkles.

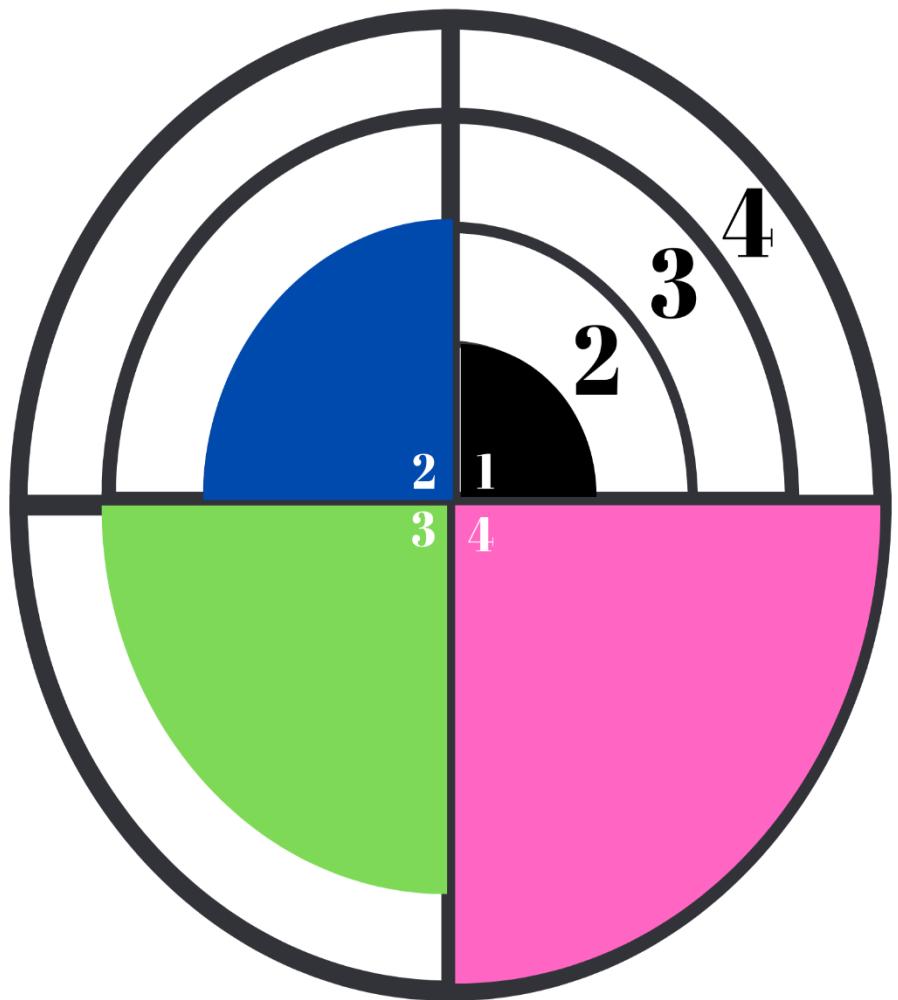

<https://www.skinsoftware/journal/amino-acids-for-skin#:~:text=Proline%20is%20considered%20to%20be,to%20anti%2Dageing%20beauty%20products.>

What are the essential amino acids for old people?

Shore Up Aging Muscles with Branched-Chain Amino Acids

The branched-chain amino acids (BCAAs)—leucine, isoleucine, and valine—are essential amino acids that play important metabolic roles, particularly during exercise and in the maintenance and growth of skeletal muscle.

<https://www.lifeextension.com/magazine/2010/11/halt-age-related-muscle-loss#:~:text=Shore%20Up%20Aging%20Muscles%20with,and%20growth%20of%20skeletal%20muscle.>

## **DNA Sequence Protein Combination Key**

- 1      Phenylalanine
- 2      Leucine
- 3      Serine
- 4      Tyrosine
- 5      STOP
- 6      Cysteine
- 7      Tryptophan
- 8      Proline
- 9      Histidine
- 10     Glutamine
- 11     Arginine
- 12     Isoleucine
- 13     Methionine
- 14     Threonine
- 15     Asparagine
- 16     Lysine
- 17     Valine
- 18     Alanine
- 19     Aspartic Acid
- 20     Glutamic Acid
- 21     Glycine

Lastly let us look at the DNA sequence name for GOD that is CTCTCTCTCTCT.

Looks large enough. Now let us find out what this stands for. Are you ready?

CTC = 2 = Leucine

TCT = 3 = Serine

CTC = 2 = Leucine

TCT = 3 = serine

God is therefore Leucine + Serine + Leucine + Serine.

First God created a human being with his image. A human being has twenty-three chromosomes. As a double helix 23.23 that is Leucine + Serine + Leucine + Serine = 46 Chromosomes just like in human beings.

What is Leucine and what does it do? Secondly, what is Serine and what does it do? Does any of this have something to do with God?

But God is known by a different name than God as Yahweh in the Hebrew language.

They say that DNA has bridges at every 10 5 6 5 positions in the DNA sequence and this in the Hebrew language means YHWH.

Therefore, Yahweh is already in every DNA sequence at every

bridge.

The body recognizes Yahweh as a DNA sequence, and this is GTCGTCGTCGTC.

. This is GTC X 4 = 17 + 17 +17 +17 = Valine + Valine + Valine +Valine

What does Valine do?

What is Valine and does it have anything to link to Yahweh?

What is Valine?

white, cystalline, essential amino acid,  
 $(CH_3)_2CHCH(NH_2)COOH$ , found in small quantities in many proteins.

.....To Be Continued in Volume II of The Book.....

Still to come in Volume II.

1. Detailed DNA sequence analysis in detail with proof beyond doubt. A genuine guide to real proteins and products that improve life. I think most people must agree that enough is enough. It is time human life is put first as the way things should be. I have all the answers to exactly what you will need to see remarkable results in every aspect of life. This is because we are speaking the correct language of the.

A] Brain. We decoded the brain, and our brain commands reverse a lot of harmful effects. Our brain codes work because we are speaking the exact language of the brain. We do not guess. We will tell you the truth. Visit our shop [www.xcodes.shop](http://www.xcodes.shop) You must buy or try free ones, even on your pets, to see if this works.

B] Now we speak the DNA language and tell you exactly what protein combination you will need to see impressive results. The reason being that this is the code used to make hair, penis, breasts, nails, skin, hands, muscle etc. So, a combination in the correct sequence of the protein is what will get you real results. Stop giving people reasons to lie to you. Get the facts right buy our books. I have included a lot of links for you to read while waiting for volume 11.

Visit our website
