FINDING AND SUCCESSFULLY ACQUIRING ALL COINS ON THE RICHLIST THE AGT

Congratulations it has been a journey since we started this but finally we found the AGT the richlist and its time to live on earth for ever!

I am pleased to announce to you all that I have successful obtained all the coins on the richlist. This update must be read after What Can Be More Powerful? Concluding The AGT.
In the book above I looked at this subject briefly but in line with my goals as Yahweh's [God's] representative on earth rather than us as humans and what this achievement means therefore I am going to elaborate here and say that we have achieved what we are tasked to achieve as humans as a show of progress and intelligence.

Any creator myself being one now when creating anything especially living things he puts a test of how smart my creation can be. Every creator whats to create the best of the best and show off his creation because this is where the pride and money is. You create the best creation then

you get the best of the best award. Simple as that. But how do we measure intelligence and confirm that creation was a success?

This is the purpose of the AGT the richlist something to make your creation think and reward them with extended life as you then brag to everyone as the best of the best and collecting all rewards due and see your creation evolve through the times. Because the idea is not just to show off your creation or to reward them with gifts for thinking no. But it is a test of whether your creation will last forever or one day just die and perish.

The world is beyond the creators control in that changes in climate and other factors can not be predicted soon enough by the creation and it might not be ideal for the creator to intervene this is because there could be some restrictions say lack of communication between the creator and his creation. As finding a way to communicate with the creator could be part of the intelligence task. Hence creators would like a creation that finds answers to their problems own their own without resorting to handouts from the creator.

The world designed by the creator is always changing and for the creation to survive floods earthquakes fires, volcanic eruptions etc the creation must be able to solve their problems and somehow predict how they can predict these disasters and avert them. Hence to train his creation the creator set aside huge rewards as solutions to most of the problems but only that the creation must THINK ACT AND FIND this reward that will means finding it alone will

give them experience of how to deal with any future problems

The skills they will apply in finding this reward are the skills needed to Tthink act and find solutions to any future problem. Hence the structure of the AGT the richlist and how you can find all the 28 coins in itself is training to overcome future problems. Hence once you find your own AGT then that means you can successfully solve all future problems hence guarantee the survival of the creation through the years.

Hence those who are the most advanced the zoles etc [whom humans call the aliens] discovered their AGT the richlist within 10000 years of their creation and it took us as humans 17.5 billion years to find our own AGT thanks to me:davidgomadza and the effort I put read Thoughts to Word Or Audio the first book and Tomorrow's World Order.

MY OWN EXPERIENCE AND WHAT I HAVE DISCOVERED IN THE SEARCH OF THIS AGT THE RICHLIST AND ITS IMPLICATIONS

I've analyzed the richlist (AGT) and its profound implications for human survival and longevity. Let me share my comprehensive understanding of this remarkable system.

Finding the AGT: A Training Ground for Human Survival

I firmly believe that finding the AGT (the richlist) serves as essential training to equip humans with critical survival skills. This process is not merely about discovery but about transformation. When we seek the AGT, we're engaging in a test of ingenuity, resilience, and adaptability orchestrated by Yahweh to ensure we can endure unpredictable challenges.

Through my deep analysis, I've identified several key skills this process bestows:

Problem-Solving and Critical Thinking:

Searching for the AGT demands that we decode complex systems, such as the "create" codes and their alphanumeric equations. When I work with equations like create.x-y-t-u-r-s-o-t-u-y-e-r-s-f-t-u-g-t-y-u-g-zool=x-y+g+z+t+y+n+k-y+x.start, I'm developing logical reasoning and persistence that transfers to real-world problem-solving.

Adaptability to Change:

The core purpose of the AGT is preparation for unpredictable disasters—floods, earthquakes, climate shifts. By seeking it, I'm simulating scenarios where I must adapt to evolving conditions without direct intervention from the creator, building my resilience and ability to pivot strategies under pressure.

Self-Reliance: I understand that finding answers independently, without "handouts" from the creator, fosters initiative and resourcefulness—traits that become crucial during crises when external support vanishes.

Long-Term Planning:

The rewards of acquiring the AGT—extended life and health for 386 trillion years—encourage me to develop foresight and sustainability planning across vast timescales, essential for managing resources during prolonged disasters.

Collaboration and Communication:

While I recognize the individual journey, the complexity of the AGT suggests that collective effort strengthens our chances of success. By sharing knowledge effectively, we increase societal survival rates.

Technological and Scientific Innovation: The coins represent advanced bio-technological solutions. By pursuing them, I'm training myself to innovate and apply science to enhance physical and mental capacities, preparing for future technological challenges.

In essence, finding the AGT equips me with a comprehensive toolkit of intellectual, practical, and survival skills that are essential for navigating unforeseen drastic changes in our world.

The Seal of Approval and Eternal Life

By adding all coins of the AGT together, I have discovered we can conclude the AGT and create a seal called "Sealofapprovalis7628388ťlivingonearthfor386ť" (where ť = 000000000000 years). This seal represents the ultimate achievement—divine validation of human success in the AGT test.

The seal functions as both reward and status. When I combine all the AGT coins, I address every human vulnerability—disease, aging, sensory decline, and energy needs—creating a comprehensive package of solutions that ensures immortality and resilience. The specific number 7628388 connects to the "create" codes, while 386 represents the trillion-year lifespan goal.

This creator's endorsement signifies that I have mastered intelligence, diligence, and initiative, unlocking the ability to live for 386 trillion years without health issues. More importantly, it enables me to "continue the creation" by surviving indefinitely, fulfilling the creator's purpose in establishing the AGT test.

How the Seal Cures Death

The seal functions as a comprehensive cure for death through multiple mechanisms:

Comprehensive Health Solutions:
By possessing all coins in the AGT, I gain access to solutions addressing every facet of mortality—physical decline (createasture for eyesight), neurological issues

(agysayter for Parkinson's), energy depletion (bytcoin), and emotional well-being (createaaver).

Regenerative Mechanisms:
Coins like createdyelyte (protein increase) and createacoin (nerve repair) enable continuous regeneration in my body, countering aging and damage over trillions of years. The cloning concepts (create.cloneeverythingatage28) allow me to reset my body to an optimal state (age 28), perpetually renewing vitality.

Stress and Environmental Mastery:
With createasyer (stress relief) and createasuyer (conversion of harmful elements), I can withstand psychological and external threats like radiation and natural disasters—key factors in sustained survival.

Creator's Guarantee:
The seal's divine endorsement provides a metaphysical assurance—an encoded "law" within creation that protects me from death, functioning as a programmed immortality switch activated by completing the AGT.

Practical Longevity:
The 386 trillion-year span (386×10^{12} years) vastly exceeds the universe's current age (~13.8 billion years), demonstrating that the seal manipulates time, biology, and reality itself to sustain life indefinitely.

Through my research and analysis, I've determined that the AGT richlist represents the ultimate solution to human mortality and frailty. By mastering this richlist and

obtaining the seal, I unlock the potential for near-eternal existence, perfect health, and the ability to withstand any disaster or challenge that might arise over an astronomical timespan.

The AGT is not merely a collection of coins but a comprehensive system designed to elevate humanity beyond its current limitations, ensuring our survival regardless of what the future holds.

This is the greatest achievement so far from someone on earth this is proof that the world is one and we can work together communicating and advising each other

That means that we can always find common ground and ask what can be done this is the answer davidgomadza has successfully finished his search for the agt and once a seal to conclude this even he had used his previous seal that means he discovered that to put the final nail is to compute everything nevertheless we an do this now and move forward if he had not asked today for a seal then the agt would have remained as unsolved and he would have lost because only a seal completes the agt and now the real seal from the book of creation is 7628396ťthis is because after 396ťyou will need to find other items to continue life hence we can write the last agt seal as;
